Preface	ix
0. Introduction	1
1. Elliptic Systems in the Plane	
1. <i>Introduction</i>	6
2. <i>Hyperanalytic Functions</i>	11
3. <i>Generalized Derivatives and the Hypercomplex Pompeiu Operator</i>	24
4. <i>Generalized Hyperanalytic Functions and Liouville's Theorem</i>	32
5. <i>Cauchy Representation for Generalized Hyperanalytic Functions</i>	44
6. <i>M-Analytic Functions</i>	53
7. <i>Approximate Solutions</i>	57
2. Boundary Value Problems	
1. <i>Introduction</i>	61
2. <i>The Plemelj Formulas</i>	63
3. <i>The Hilbert Problem for Hyperanalytic Functions</i>	65
4. <i>The Representation of a Piecewise Generalized Hyperanalytic Function in Terms of a Density</i>	70
5. <i>The Hilbert Problem for Generalized Hyperanalytic Functions</i>	75
6. <i>The Hilbert Problem in the Purely Hypercomplex Case</i>	83
7. <i>The Riemann–Hilbert Problem for Hypercomplex Functions</i>	87
8. <i>The Representation of a Generalized Hyperanalytic Function in Terms of a Real Density</i>	92
9. <i>The Riemann–Hilbert Problem for Generalized Hyperanalytic Functions</i>	93
10. <i>The Riemann–Hilbert Problem in the Purely Hypercomplex Case</i>	102
3. Reductions to Hyperanalyticity	
1. <i>Introduction</i>	109
2. <i>Similarity Principles</i>	110

3. <i>Global Similarity Principle</i>	121
4. <i>The Riemann–Hilbert Problem</i>	133
5. <i>Hyperanalytic Functions Having Distributional Boundary Data</i>	136
6. <i>Nonlinear Problems and Reductions to Linear Problems</i>	140
7. <i>Liouville's Theorem and the Similarity Principle for Pascali Systems</i>	144
4. Function Theory over Clifford Algebras	
1. <i>Introduction</i>	150
2. <i>Regular Functions</i>	154
3. <i>Hilbert Modules</i>	165
4. <i>Liouville's Theorem</i>	172
5. <i>α-Holomorphic Functions</i>	174
6. <i>Generalized Regular Functions in \mathbb{R}^n</i>	175
7. <i>Overdetermined Elliptic Systems</i>	199
8. <i>Function Theory for Higher Order Elliptic Systems with Analytic Coefficients</i>	207
9. <i>Commutative Alternatives for Higher Dimensional Function Theory</i>	210
5. Partial Differential Equations of Several Complex Variables	
1. <i>Inhomogeneous Cauchy–Riemann Equations in Polycylinders</i>	216
2. <i>Inhomogeneous Cauchy–Riemann Systems for Several Unknowns</i>	221
3. <i>Existence Theorems for Solutions of Partial Differential Equations in Several Complex Variables</i>	226
4. <i>Real-Linear Equations in Two Complex Variables</i>	231
5. <i>Nonhomogeneous Cauchy–Riemann Equations in Analytic Polyhedra</i>	240
6. <i>Pluriharmonic Functions</i>	253
Bibliography	269
Index	275
