

## TABLE OF CONTENTS

CHAPTER 1 : Sequential Solutions of Nonlinear PDEs	1
0 Introduction	1
1 The Problem of Stability of Sequential Solutions	2
2 Defining the Quotient Spaces and Algebras	5
3 The Notion of Sequential Solution	10
4 Exactness of Sequential Solutions	12
5 Interplay between Stability, Generality and Exactness	13
6 The Deficiency of the Distributional Approach Concerning Exactness	17
7 Resolution of Nowhere Dense Singularities	19
8 Preservation of Ellipticity and Hypoellipticity	24
9 General Nonlinear PDEs	25
10 Variable Transforms	27
11 Stronger Conditions for Partial Derivative Operators	30
12 Systems of Nonlinear PDEs	32
13 A Cesaro Characterization of the Nowhere Dense Ideal	34
CHAPTER 2 : Necessary and/or Sufficient Conditions for the Existence of Sequential Solutions	37
0 Introduction	37
1 Subsequence Quasi Invariant Sequential Solutions	38
2 Applications to Linear and Nonlinear PDEs	44
3 Subsequence Invariant Sequential Solutions	46
4 Resolvent Sets	51
5 Domains of Solvability	55
6 Remarks on Lemma 2	62

CHAPTER 3 : Algebras Containing the Distributions	65
0 Introduction	65
1 Embedding the Distributions into Quotient Algebras	65
2 Simpler Inclusion Diagrams	68
3 Regularizations and Chains of Quotient Algebras Containing the Distributions	69
4 Existence, Characterization and Construction of Regularizations	75
5 Additional Chains of Quotient Algebras Containing Distributions	88
6 Quotient Algebras Containing Large Subspaces of Distributions	97
7 Quotient Algebras Possessing Special Properties	104
8 Definition of Positive Powers for Certain Generalized Functions	107
9 Limitations on Embedding Smooth Functions into Chains of Quotient Algebras	110
10 Special Classes of Regular Ideals	113
11 The Proof of Lemma 1	115
12 Example of Shrinking Non- $\delta$ Sequence	117
13 Inexistence of the Largest Regular Ideals	118
CHAPTER 4 : Resolution of Singularities of Weak Solutions for Polynomial Nonlinear PDEs	121
0 Introduction	121
1 The Case of Simple Polynomial Nonlinear PDEs	122
2 Resolution of Singularities of Nonlinear Shock Waves	131
3 Resolution of Singularities of Klein-Gordon Type Nonlinear Waves	133
4 Resolution of Singularities of Weak Solutions for General Polynomial Nonlinear PDEs	134
5 Junction Conditions and Resolution of Singularities of Weak Solutions for the Equations of Magneto-hydrodynamics and General Relativity	139

6	Resoluble Systems of Polynomial Nonlinear PDEs	152
7	Computation of the Junction Conditions	155
8	Examples of Resoluble Systems of PDEs	156
CHAPTER 5:	Stability and Exactness of Sequential and Weak Solutions for Polynomial Nonlinear PDEs	163
0	Introduction	163
1	Basic Facts and Remarks Concerning Stability	163
2	Maximal Stability	165
3	Interplay between Stability and Exactness	167
4	Remarks in the Finite Smoothness Case	167
5	Stability of Regular Weak Solutions	168
6	Stability of Solutions with Jump Discontinuities for Resoluble Systems of PDEs	170
CHAPTER 6:	Characterization of the Necessary Structure of the Algebras Containing the Distributions	173
0	Introduction	173
1	Zero Filters	174
2	Density Characterization of Z-Filters	176
3	Large $C^\infty$ -Regular Ideals	178
4	Further Properties of Z-Filters	182
5	Construction and Characterization of a Class of Vanishing Ideals	185
6	Countable Reduced Products of Vector Spaces	194
CHAPTER 7:	Quantum Scattering in Potentials Positive Powers of the Dirac $\delta$ Distribution	199
0	Introduction	199
1	Wave Function Solutions and Junction Relations	199
2	Weak Wave Function Solutions	201
3	Smooth Representations for the Dirac $\delta$ Distribution and Smooth Weak Wave Function Solutions	210
4	Wave Function Solutions in the Algebras Containing the Distributions	214

5	Stability and Exactness of the Wave Function Solutions	220
CHAPTER 8 :	Products with Dirac $\delta$ Distributions	223
0	Introduction	223
1	A Class of Regularizations	223
2	Products with Dirac $\delta$ Distributions	229
3	Application to a Riccati Differential Equation	234
4	Validity of Formulas in Quantum Mechanics	235
5	The Existence of the Sequences of Functions in $Z_\delta$	242
6	Remark on Nilpotent Elements in the Quotient Algebras	249
CHAPTER 9 :	Linear Independent Families of Dirac $\delta$ Distributions at a Point	251
0	Introduction	251
1	Compatible Quotient Algebras and Independent Variable Transforms	251
2	Linear Independent Families of Dirac $\delta$ Distributions at a Point	255
3	Generalized Dirac $\delta$ Distributions	257
CHAPTER 10:	Support and Local Properties	265
0	Introduction	265
1	Support of Elements in Quotient Algebras	265
2	Localization within the Quotient Algebras	270
3	Equivalence between $S=0$ and $\text{supp } S=\emptyset$	278
4	Domains of Solvability for Polynomial Nonlinear PDEs	279
FINAL REMARKS		281
APPENDIX 1:	Neutrix Calculus and Negligible Sequences of Functions	285
APPENDIX 2:	The Embedding Impossibility Result of L.Schwartz	289
APPENDIX 3:	A Nonlinear Extension of the Lax-Richtmyer Equivalence between Stability and Convergence of	

	Difference Schemes	293
APPENDIX 4:	The Cauchy-Bolzano Quotient Algebra Construction of the Real Numbers	301
