

C O N T E N T S

I. 45 minutes Lectures

S. Bergman

On the mathematical theory of flow patterns  
of compressible fluids 1

A. V. Bitsadze

On a class of nonlinear partial differential  
equations 10

B. Bojarski

Elliptic transmission problems and pairs of  
Fredholm subspaces to be published  
elsewhere

D. Colton

Integral operators and inverse problems in  
scattering theory 17

A. Džuraev

Study of partial differential equations by  
the means of generalized analytical functions 29

G. Fichera (joint paper with P. Ricci)

The single layer potential approach in the  
theory of boundary value problems for  
elliptic equations 39

R. P. Gilbert (joint paper with G. S. Hsiào)

Constructive function theoretic methods for  
higher order pseudo-parabolic equations 51

I. Z. Gohberg

The modern theory of one-dimensional singular  
integral equations to be published  
elsewhere

V. D. Kupradze

Über die Lösung einiger nichtklassischer Pro-  
bleme der Elastizitätstheorie 68

I. 45 minutes LecturesR. F. Millar

The singularities of solutions to analytic elliptic boundary value problems

73

I. N. Vekua

Über einige neuere Anwendungen der verallgemeinerten Cauchy-Riemannschen Gleichungen in der Schalentheorie

88
