

CONTENTS

	<i>Preface</i>	v
Chapter 1	Introduction to Partial Differential Equations; First-order Equations	1
	1-1 Introduction	1
	1-2 Classification of Equations; Notation	1
	1-3 Formation of Equations; Geometric Examples	3
	1-4 Linear First-order Equations	8
	1-5 Quasilinear First-order Equations; Method of Lagrange	15
	1-6 Cauchy Problem for Quasilinear First-order Equations Problems	24 30
Chapter 2	Linear Second-order Equations	38
	2-1 Introduction	38
	2-2 Linear Second-order Equations in Two Independent Variables	39
	2-3 Linear Second-order Equations in n Independent Variables	43
	2-4 Normal Forms. Hyperbolic, Parabolic, and Elliptic Equations	47
	2-5 Cauchy Problem for Linear Second-order Equations in Two Independent Variables	58
	2-6 Cauchy Problem for Linear Second-order Equations in n Independent Variables	69
	2-7 Adjoint Operator. Green's Formula. Self-adjoint Differential Operator Problems	79 82
Chapter 3	Elliptic Differential Equations	92
	3-1 Introduction	92
	3-2 Laplace's Equation and Poisson's Equation. Properties of Harmonic Functions	94
	3-3 Separation of Variables in Laplace's Equation	102
	3-4 Spherical Harmonics	115

	3-5 Self-Adjoint Elliptic-type Boundary-value Problems	123
	Problems	144
Chapter 4	The Wave Equation	160
	4-1 Introduction	160
	4-2 One-dimensional Wave Equation; Initial-value Problem	161
	4-3 Vibrating String. Separation of Variables	170
	4-4 Two-dimensional Wave Equation. Initial-value Problem	184
	4-5 Boundary- and Initial-value Problem for the Two-dimensional Wave Equation	191
	4-6 Initial-value Problem for the Three-dimensional Wave Equation	204
	4-7 Spherical Waves. Cylindrical Waves Problems	215 228
Chapter 5	The Heat Equation	282
	5-1 Introduction	282
	5-2 Initial-value Problems	286
	5-3 Boundary- and Initial-value Problem for the Heat Equation. Method of Eigenfunctions	295
	5-4 Maximum-Minimum Principle for the Heat Equation. An Existence and Uniqueness Theorem Problems	305 314
Appendix 1	Cauchy-Kowalewski Theorem (Special Case)	321
Appendix 2	Sturm-Liouville Problems. Fourier Series, Fourier-Legendre and Fourier-Bessel Series	328
Appendix 3	References and Bibliography	349
Appendix 4	Answers	353
