<b>List of Symbols</b>	<b>iii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Holomorphic and analytic functions . . . . .	1
1.2 Rational functions . . . . .	2
1.3 Iteration theory . . . . .	8
<b>2 Rational functions with empty Fatou set</b>	<b>15</b>
2.1 Known results and simple examples . . . . .	15
2.2 The Schwarzian derivative . . . . .	20
2.3 New classes of functions with empty Fatou set . . . . .	30
2.4 Examples . . . . .	35
<b>3 Jordan arc Julia sets</b>	<b>43</b>
3.1 First results . . . . .	43
3.2 Form of a function whose Julia set is a Jordan arc . . . . .	62
3.3 Sufficient conditions in the attracting case . . . . .	71
3.4 Non-analytic Jordan arcs of real functions . . . . .	79
3.5 Sufficient conditions in the parabolic case . . . . .	84
<b>4 Real Julia sets</b>	<b>105</b>
4.1 General results . . . . .	105
4.2 The functions whose Julia set is $\mathbb{R} \cup \{\infty\}$ . . . . .	106
4.3 The functions whose Julia set is a real interval . . . . .	111
4.4 The functions whose Julia set is a real Cantor set . . . . .	113
4.5 The polynomials with a real Julia set . . . . .	117
<b>5 Level curves</b>	<b>119</b>
5.1 No critical values on the coordinate axes . . . . .	119
5.2 The general case . . . . .	120
5.3 The behaviour beside the level curves . . . . .	127
5.4 Level curves of real rational functions . . . . .	129
5.4.1 Local behaviour near a real zero . . . . .	129
5.4.2 The number of preimages of a purely imaginary point in the upper and in the lower half-plane . . . . .	134
5.4.3 Additional results in the case $\mathcal{J}_R = [-1, 1]$ . . . . .	136

5.5	Explicitly computed level curves . . . . .	143
<b>6</b>	<b>Julia sets of Blaschke products</b>	<b>153</b>
6.1	Basic definitions and properties . . . . .	153
6.2	General results . . . . .	155
6.3	Characterizations of the three possible cases . . . . .	161
6.4	Additional results . . . . .	171
6.4.1	The exceptional set of a Blaschke product . . . . .	171
6.4.2	The special case $B(0) \in \{0, \infty\}$ . . . . .	172
6.4.3	Characterization of the Julia sets of real Blaschke products with all zeros in the unit disc . . . . .	173
6.4.4	Bounds on the location of the zeros if the Julia set is an arc on the unit circle . . . . .	179
	<b>Bibliography</b>	<b>184</b>
