
Contents

Chapter I The Beginning

- 1 Overview 1

Chapter II Classical Background

- 2 Hamiltonian Formalism 19
- 3 Liouville Integrable Systems 27
- 4 Birkhoff Integrable Systems 34
- 5 KAM Theory 39

Chapter III Birkhoff Coordinates

- 6 Background and Results 51
- 7 Actions 63
- 8 Angles 69
- 9 Cartesian Coordinates 74
- 10 Orthogonality Relations 85
- 11 The Diffeomorphism Property 91
- 12 The Symplectomorphism Property 102

Chapter IV Perturbed KdV Equations

- 13 The Main Theorems 111
- 14 Birkhoff Normal Form 118
- 15 Global Coordinates and Frequencies 127
- 16 The KAM Theorem 133
- 17 Proof of the Main Theorems 139

Chapter V The KAM Proof

- 18 Set Up and Summary of Main Results 145
- 19 The Linearized Equation 152
- 20 The KAM Step 160
- 21 Iteration and Convergence 165
- 22 The Excluded Set of Parameters 171

Chapter VI Kuksin's Lemma

- 23 Kuksin's Lemma 177

Chapter VII Background Material

- A Analyticity 187
- B Spectra 194
- C KdV Hierarchy 207

Chapter VIII Psi-Functions and Frequencies

- D Construction of the Psi-Functions 211
- E A Trace Formula 223
- F Frequencies 227

Chapter IX Birkhoff Normal Forms

- G Two Results on Birkhoff Normal Forms 233
- H Birkhoff Normal Form of Order 6 240
- I Kramer's Lemma 248
- J Nondegeneracy of the Second KdV Hamiltonian 252

Chapter X Some Technicalities

- K Symplectic Formalism 257
- L Infinite Products 260
- M Auxiliary Results 262
