Preface ix

1 The Maslov index 1
- 1.1 The symplectic group . . . 1
- 1.2 The Maslov index in dimension 2 . . . 4
  - 1.2.1 The topology of $Sp(2)$ . . . 4
  - 1.2.2 The rotation function on $Sp(2)$ . . . 5
  - 1.2.3 The Maslov index for non-degenerate paths in $Sp(2)$ 9
- 1.3 The Maslov index in dimension $2N$ . . . 10
  - 1.3.1 The Krein signature on $Sp(2N)$ . . . 10
  - 1.3.2 Normal forms of semi-simple symplectic matrices . . 14
  - 1.3.3 The topology of $Sp(2N)$ . . . 17
  - 1.3.4 The rotation function on $Sp(2N)$ . . . 19
  - 1.3.5 Decomposition of $Sp(2N)$ . . . 24
  - 1.3.6 The Maslov index of non-degenerate paths in $Sp(2N)$ 28
  - 1.3.7 The Maslov index of degenerate paths in $Sp(2N)$ . . 31
- 1.4 The Maslov index of a linear Hamiltonian system . . . 32
  - 1.4.1 Iteration formulas . . . 33
- 1.5 The Maslov index of an autonomous system . . . 37
- 1.6 Some bibliography and further remarks . . . 41

2 The relative Morse index 43
- 2.1 Commensurable spaces and relative dimension . . . 43
  - 2.1.1 Further properties . . . 46
- 2.2 Fredholm pairs of subspaces . . . 49
- 2.3 Relative Morse index of quadratic forms . . . 51
  - 2.3.1 Further properties . . . 55
- 2.4 Relative Morse index of critical points . . . 57
- 2.5 Finite dimensional reductions . . . 58
- 2.6 Some bibliography and further remarks . . . 62

3 Functional setting **63**
3.1 Fractional Sobolev spaces 63
3.2 Linear Hamiltonian systems 67
3.2.1 Comparison between the relative Morse index and the Maslov index 69
3.3 Nonlinear Hamiltonian systems 74
3.4 Linear Lagrangian systems 78
3.4.1 Comparison between the Morse index and the Maslov index 80
3.5 Nonlinear Lagrangian systems 83
3.6 Some bibliography and further remarks 85

4 Superquadratic Hamiltonians **87**
4.1 Abstract critical point theory 87
4.1.1 The (PS) and $(PS)^*$ condition 87
4.1.2 A review of Morse theory 90
4.1.3 Linking theorems and Morse index estimates 94
4.1.4 Strongly indefinite functionals 97
4.2 Superquadratic Hamiltonians 100
4.2.1 Minimality of the period 108
4.3 A Birkhoff-Lewis type theorem 110
4.4 Some bibliography and further remarks 117

5 Asymptotically linear systems **119**
5.1 Non-resonant systems 120
5.1.1 Abstract asymptotically quadratic functionals 120
5.1.2 Morse relations for non-resonant systems 126
5.1.3 Solutions of higher period 129
5.2 Morse relations for autonomous systems 131
5.2.1 Growth of the number of periodic solutions of autonomous systems 132
5.3 Systems with resonance at infinity 136
5.3.1 Abstract asymptotically quadratic functionals, degenerate at infinity 136
5.3.2 Resonant systems 147
5.4 Some bibliography and further remarks 151

6 The Arnold conjectures for symplectic fixed points **153**
6.1 The Arnold conjectures 153
6.1.1 Hamiltonian diffeomorphisms of the two-torus 156
6.1.2 Non-degenerate fixed points on the torus 160
6.1.3 Degenerate fixed points on the torus 163
6.2 The Arnold conjectures on the projective space 165

6.3 Periodic points on the torus 169
6.4 Some bibliography and further remarks 171

Bibliography **173**

Index **187**
