

CONTENTS

Preface	vii
Introduction	xi
Chapter 1. Ordinary differential equations	1
1.1 Evolution equation in Hilbert space	1
1.2 Operator evolution equations	7
1.3 Symmetries and first integrals	13
1.4 Alternative linearization approaches	20
1.4.1 Wackerbauer linearization	20
1.4.2 Koopman-Alanson linearization	23
Chapter 2. Partial differential equations	35
2.1 Evolution equation in Hilbert space	35
2.2 Operator evolution equations	40
2.3 Symmetries and first integrals	42
Chapter 3. Difference equations	47
3.1 Evolution equation in Hilbert space	47
3.2 Operator evolution equations	49
3.3 Functional equations	51
3.3.1 Abstract equation in Hilbert space	51
3.3.2 Linearization transformations	52
Chapter 4. Applications	55
4.1 First integrals	55
4.1.1 Ordinary differential equations	55
4.1.2 Partial differential equations	59
4.2 Linearization transformations	65
4.2.1 Ordinary differential equations	65
4.2.2 Partial differential equations	68

4.3	Bäcklund transformations	71
4.4	Feigenbaum-Cvitanovic renormalization equations	74
4.5	Chaos	76
A p p e n d i x	A. Hilbert spaces	79
A p p e n d i x	B. Quantum mechanics	83
A p p e n d i x	C. Bose operators and coherent states	93
	C.1 Bose operators and coherent states for k -degrees of freedom	93
	C.2 Bose field operators and functional coherent states	101
A p p e n d i x	D. Position and momentum operators	109
A p p e n d i x	E. Functional derivative	113
	Bibliography	117
	Symbol index	121
	Subject index	123
