

Contents

Preface	vii
1 Preliminaries	1
1.1 General notation	1
1.2 Graphs, loops and cycles	5
2 Interval maps	17
2.1 The Sharkovskii Theorem	17
2.2 Maps with the prescribed set of periods	34
2.3 Forcing relation	45
2.4 Patterns for interval maps	46
2.5 Antisymmetry of the forcing relation	52
2.6 P -monotone maps and oriented patterns	61
2.7 Consequences of Theorem 2.6.13	74
2.8 Stability of patterns and periods	82
2.9 Primary patterns	84
2.10 Extensions	88
2.11 Characterization of primary oriented patterns	95
2.12 More about primary oriented patterns	103
3 Circle maps	109
3.1 Liftings and degree of circle maps	109

3.2	Lifted cycles	117
3.3	Cycles and lifted cycles	121
3.4	Periods for maps of degree different from $-1, 0$ and 1	124
3.5	Periods for maps of degree 0	127
3.6	Periods for maps of degree -1	130
3.7	Rotation numbers and twist lifted cycles	139
3.8	Estimate of a rotation interval	159
3.9	Periods for maps of degree 1	165
3.10	Maps of degree 1 with the prescribed set of periods	171
3.11	Other results	176
3.12	Appendix: Lifted patterns	178

4 Entropy **187**

4.1	Definitions	187
4.2	Entropy for interval maps	198
4.3	Horseshoes	205
4.4	Entropy of cycles	220
4.5	Continuity properties of the entropy	235
4.6	Semiconjugacy to a map of a constant slope	249
4.7	Entropy for circle maps	261
4.8	Proof of Theorem 4.7.3	277

Bibliography **291**

List of symbols **320**

Index **322**
