Preface	vii
1. FIRST ORDER DIFFERENTIAL EQUATIONS	1
1.0 Introduction	1
1.1 Method of upper and lower solutions	2
1.2 Method of quasilinearization	10
1.3 Extensions	15
1.4 Generalizations	30
1.5 Refinements	52
1.6 Notes	67
2. FIRST ORDER DIFFERENTIAL EQUATIONS (CONT.)	69
2.0 Introduction	69
2.1 Periodic boundary value problems	70
2.2 Anti-periodic boundary value problems	95
2.3 Interval analysis and quasilinearization	113
2.4 Higher order convergence	132
2.5 Another refinement of quasilinearization	138
2.6 Extension to system of differential equations	160
2.7 Notes	179
3. SECOND ORDER DIFFERENTIAL EQUATIONS	181
3.0 Introduction	181
3.1 Method of upper and lower solutions.	182
3.2 Extension of quasilinearization	186
3.3 Generalized quasilinearization	191
3.4 General second order BVP	197

3.5	General second order BVP (continued)	209
3.6	Higher order convergence	214
3.7	Notes	220
4.	MISCELLANEOUS EXTENSIONS	221
4.0	Introduction	221
4.1	Dynamic systems on time scales	222
4.2	Integro-differential equations	229
4.3	Functional differential equations	237
4.4	Impulsive differential equations	244
4.5	Stochastic differential equations	253
4.6	Differential equations in a Banach space	262
4.7	Notes	267
	References	269
	Index	275
