

## TABLE OF CONTENTS

CHAPTER I.	ELEMENTS OF STABILITY THEORY .....	1
1.	A First Glance at Stability Concepts .....	1
2.	Various Definitions of Stability and Attractivity .....	6
3.	Auxiliary Functions .....	11
4.	Stability and Partial Stability .....	13
5.	Instability .....	19
6.	Asymptotic Stability .....	25
7.	Converse Theorems .....	44
8.	Bibliographical Note .....	47
CHAPTER II.	SIMPLE TOPICS IN STABILITY THEORY .....	49
1.	Theorems of E.A. Barbashin and N.N. Krasovski for Autonomous and Periodic Systems .....	50
2.	A Theorem of V.M. Matrosov on Asymptotic Stability .....	60
3.	Introduction to the Comparison Method .....	73
4.	Total Stability .....	80
5.	The Frequency Method for Stability of Control Systems .....	84
6.	Non-Differentiable Liapunov Functions .....	89
7.	Bibliographical Note .....	95
CHAPTER III.	STABILITY OF A MECHANICAL EQUILIBRIUM .....	97
1.	Introduction .....	97
2.	The Lagrange-Dirichlet Theorem and Its Variants .....	98
3.	Inversion of the Lagrange-Dirichlet Theorem Using Auxiliary Functions .....	105
4.	Inversion of the Lagrange-Dirichlet Theorem Using the First Approximation .....	108

5. Mechanical Equilibrium in the Presence of Dissipative Forces .....	113
6. Mechanical Equilibrium in the Presence of Gyroscopic Forces .....	115
7. Bibliographical Note .....	126
CHAPTER IV. STABILITY IN THE PRESENCE OF FIRST INTEGRALS .....	128
1. Introduction .....	128
2. General Hypotheses .....	129
3. How to Construct Liapunov Functions .....	130
4. Eliminating Part of the Variables .....	134
5. Stability of Stationary Motions .....	139
6. Stability of a Betatron .....	145
7. Construction of Positive Definite Functions ..	151
8. Bibliographical Note .....	165
CHAPTER V. INSTABILITY .....	168
1. Introduction .....	168
2. Definitions and General Hypotheses .....	170
3. Fundamental Proposition .....	172
4. Sectors .....	173
5. Expellers .....	180
6. Example of an Equation of $N^{\text{th}}$ Order .....	184
7. Instability of the Betatron .....	188
8. Example of an Equation of Third Order .....	191
9. Exercises .....	195
10. Bibliographical Notes .....	198
CHAPTER VI. A SURVEY OF QUALITATIVE CONCEPTS .....	201
1. Introduction .....	201
2. A View of Stability and Attractivity Concepts .....	204

3. Qualitative Concepts in General .....	207
4. Equivalence Theorems for Qualitative Concepts .....	215
5. A Tentative Classification of Concepts .....	222
6. Weak Attractivity, Boundedness, Ultimate Boundedness .....	227
7. Asymptotic Stability .....	235
8. Bibliographical Note .....	238
 CHAPTER VII. ATTRACTIVITY FOR AUTONOMOUS EQUATIONS .....	 241
1. Introduction .....	241
2. General Hypotheses .....	242
3. The Invariance Principle .....	242
4. An Attractivity and a Weak Attractivity Theorem .....	246
5. Attraction of a Particle by a Fixed Center .....	249
6. A Class of Nonlinear Electrical Networks .....	254
7. The Ecological Problem of Interacting Populations .....	260
8. Bibliographical Note .....	269
 CHAPTER VIII. ATTRACTIVITY FOR NON AUTONOMOUS EQUATIONS .....	 270
1. Introduction, General Hypotheses .....	270
2. The Families of Auxiliary Functions .....	271
3. Another Asymptotic Stability Theorem .....	280
4. Extensions of the Invariance Principle and Related Questions .....	285
5. The Invariance Principle for Asymptotically Autonomous and Related Equations .....	294
6. Dissipative Periodic Systems .....	305
7. Bibliographical Note .....	310

CHAPTER IX. THE COMPARISON METHOD .....	313
1. Introduction .....	313
2. Differential Inequalities .....	314
3. A Vectorial Comparison Equation in Stability Theory .....	320
4. Stability of Composite Systems .....	327
5. An Example from Economics .....	332
6. A General Comparison Principle .....	336
7. Bibliographical Note .....	342
APPENDIX I. DINI DERIVATIVES AND MONOTONIC FUNCTIONS .....	345
1. The Dini Derivatives .....	345
2. Continuous Monotonic Functions .....	347
3. The Derivative of a Monotonic Function .....	350
4. Dini Derivative of a Function along the Solutions of a Differential Equation .....	352
APPENDIX II. THE EQUATIONS OF MECHANICAL SYSTEMS .....	355
APPENDIX III. LIMIT SETS .....	363
LIST OF EXAMPLES .....	368
BIBLIOGRAPHY .....	370
AUTHOR INDEX .....	386
SUBJECT INDEX .....	393
