

# Contents

<i>Preface</i>	xi
<b>Chapter 1 Introduction</b>	
1.1 The Significance of Sensitivity Theory	1
1.2 Historical Review	2
1.3 Sensitivity Analysis and Synthesis	3
<b>Chapter 2 Basic Concepts and Tools of Sensitivity Theory</b>	
2.1 Introduction	6
2.2 The Basic Idea of Sensitivity Theory	6
2.3 Basic Definitions	9
2.4 General Rules	10
2.5 Miller–Murray Classification of Parameter Variations Problems	16 18
<b>Chapter 3 Definitions of Sensitivity Functions and Measures</b>	
3.1 Introduction	20
3.2 Sensitivity Functions in the Time Domain	21
3.3 Sensitivity Functions in the Frequency Domain	48
3.4 Performance-Index Sensitivity Problems	79 81
<b>Chapter 4 Methods for Calculation or Measurement of Output Sensitivity Functions</b>	
4.1 Introduction	86
4.2 Direct Calculation of $\sigma(t, \alpha_0)$ by Use of Laplace Transform	87

4.3	The Output Sensitivity Equation	90
4.4	Solution to the Sensitivity Equation	104
4.5	The Variable Component Method	109
4.6	The Method of Sensitivity Points	126
4.7	Sensitivity Analysis of Networks Problems	143 156

## **Chapter 5 Methods for Calculation or Measurement of the Trajectory Sensitivity Functions**

5.1	Introduction	163
5.2	Trajectory Sensitivity Equations of Continuous Systems with Time-Invariant Parameter Variations	164
5.3	Trajectory Sensitivity Equations of Continuous Systems with Time-Varying Parameters	173
5.4	Trajectory Sensitivity Equations of Discontinuous Systems	176
5.5	Solution of the Trajectory Sensitivity Equation	193
5.6	The Theorems of Wilkie and Perkins	206
5.7	Simultaneous Measurement of All Trajectory Sensitivity Functions of General Linear Systems	214
5.8	Determination of Eigenvalue Sensitivity Problems	217 221

## **Chapter 6 Determination of the Sensitivity Functions of the Frequency Domain**

6.1	Introduction	227
6.2	Comparison Sensitivity Function	227
6.3	Root Sensitivity in Terms of Changes of the Coefficients of the Characteristic Polynomial	231
6.4	Root Sensitivities of Feedback Systems Problems	236 244

## **Chapter 7 Sensitivity Comparison of Open-Loop and Closed-Loop Systems**

7.1	Introduction	246
7.2	Sensitivity Comparison in the Frequency Domain	247
7.3	Sensitivity Comparison in the Time Domain	259
7.4	Sensitivity Comparison of Optimal Control Systems Problems	264 272

**Chapter 8 Sensitivity Analysis of Optimal Systems**

8.1	Introduction	277
8.2	Elementary Methods for the Determination of Performance-Index Sensitivity with Respect to Plant Parameter Variations	279
8.3	Determination of the Performance-Index Sensitivity by Means of a Hamilton–Jacobi Equation	284
8.4	Quantitative Valuation of Optimal Systems by Means of Performance-Index Sensitivity	294
8.5	A Relative Sensitivity Measure of Optimality (Optimality Loss) Problems	296

**Chapter 9 Applications**

9.1	Introduction	309
9.2	Automatic Optimization and Parameter Identification Using a Sensitivity Model	309
9.3	Optimization of the Input Signal for Identification	315
9.4	Design of Optimal Feedback Controls Using the Sensitivity Functions in the Performance Index	318
9.5	Sensitivity Reduction in Sampled-Data Systems	323
9.6	Final Remarks	336

<b>References</b>	338
-------------------	-----

<b>Solutions to Problems</b>	344
------------------------------	-----
