<b>Series Preface</b>	<b>vi</b>
<b>Preface</b>	<b>vii</b>
<b>Chapter 1: Introduction to Asymptotic Approximations</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 Taylor's Theorem and l'Hospital's Rule . . . . .	3
1.3 Order Symbols . . . . .	4
1.4 Asymptotic Approximations . . . . .	7
1.4.1 Asymptotic Expansions . . . . .	9
1.4.2 Accuracy versus Convergence of an Asymptotic Series . . . . .	12
1.4.3 Manipulating Asymptotic Expansions . . . . .	14
1.5 Asymptotic Solution of Algebraic and Transcendental Equations . . . . .	18
1.6 Introduction to the Asymptotic Solution of Differential Equations . . . . .	26
1.7 Uniformity . . . . .	37
1.8 Symbolic Computing . . . . .	43
<b>Chapter 2: Matched Asymptotic Expansions</b>	<b>47</b>
2.1 Introduction . . . . .	47
2.2 Introductory Example . . . . .	48
2.3 Examples with Multiple Boundary Layers . . . . .	62

2.4	Interior Layers . . . . .	68
2.5	Corner Layers . . . . .	77
2.6	Partial Differential Equations . . . . .	84
2.7	Difference Equations . . . . .	98
<b>Chapter 3: Multiple Scales</b>		<b>105</b>
3.1	Introduction . . . . .	105
3.2	Introductory Example . . . . .	106
3.3	Slowly Varying Coefficients . . . . .	117
3.4	Forced Motion Near Resonance . . . . .	123
3.5	Boundary Layers . . . . .	132
3.6	Introduction to Partial Differential Equations . . . . .	134
3.7	Linear Wave Propagation . . . . .	139
3.8	Nonlinear Waves . . . . .	142
3.9	Difference Equations . . . . .	153
<b>Chapter 4: The WKB and Related Methods</b>		<b>161</b>
4.1	Introduction . . . . .	161
4.2	Introductory Example . . . . .	162
4.3	Turning Points . . . . .	173
4.4	Wave Propagation and Energy Methods . . . . .	185
4.5	Wave Propagation and Slender Body Approximations . . . . .	190
4.6	Ray Methods . . . . .	197
4.7	Parabolic Approximations . . . . .	207
4.8	Discrete WKB Method . . . . .	212
<b>Chapter 5: The Method of Homogenization</b>		<b>223</b>
5.1	Introduction . . . . .	223
5.2	Introductory Example . . . . .	224
5.3	Multidimensional Problem: Periodic Substructure . . . . .	234
5.4	Porous Flow . . . . .	241
<b>Chapter 6: Introduction to Bifurcation and Stability</b>		<b>249</b>
6.1	Introduction . . . . .	249
6.2	Introductory Example . . . . .	249
6.3	Analysis of a Bifurcation Point . . . . .	251
6.4	Linearized Stability . . . . .	255
6.5	Relaxation Dynamics . . . . .	264
6.6	An Example Involving a Nonlinear Partial Differential Equation . . . . .	271
6.7	Bifurcation of Periodic Solutions . . . . .	281
6.8	Systems of Ordinary Differential Equations . . . . .	287

<b>Appendix A1: Solution and Properties of Transition Layer Equations</b>	<b>297</b>
A1.1 Airy Functions . . . . .	297
A1.2 Confluent Hypergeometric Functions . . . . .	299
A1.3 Higher-Order Turning Points . . . . .	302
<b>Appendix A2: Asymptotic Approximations of Integrals</b>	<b>305</b>
A2.1 Introduction . . . . .	305
A2.2 Watson's Lemma . . . . .	306
A2.3 Laplace's Approximation . . . . .	306
A2.4 Stationary Phase Approximation . . . . .	306
<b>Appendix A3: Numerical Solution of Nonlinear Boundary-Value Problems</b>	<b>309</b>
A3.1 Introduction . . . . .	309
A3.2 Examples . . . . .	310
A3.3 Computer Code . . . . .	311
