

CONTENTS

Preface	ix
List of Frequently Used Symbols	xi
Chapter 1	
Preparations of Differentiable Manifolds and Differential Topology	1
§1.1 Topological Manifolds and Differentiable Manifolds	1
§1.2 Local Properties of Differentiable Maps	17
§1.3 Tangent Bundles and Tangent Maps	26
§1.4 Introduction to the Morse Theory	35
§1.5 Sard's Theorem	45
§1.6 Transversality Theory	51
Exercises	61
Chapter 2	
Dynamical Systems on Manifolds	64
§2.1 Vector Fields on Manifolds	64
§2.2 Critical Points of Vector Fields	72
§2.3 Topological Degrees and Index of Critical Points	75
§2.4 Flows and Diffeomorphisms	79
§2.5 Limit Sets and Non-wandering Sets	83
§2.6 Minimal Sets	89
Exercises	94
Chapter 3	
Local Properties of Flows and Diffeomorphisms	97
§3.1 Rectification Theorem	97

§3.2 Behavior Near Critical Points. Linearization	99
Appendix: Introduction to the KAM Theory	107
§3.3 Hyperbolic Critical Points and Closed Orbits. Local	
Stable and Unstable Manifolds	111
§3.4 The λ -lemma	122
§3.5 Global Stable and Unstable Manifolds	127
Exercises	131
Chapter 4	
Structural Stability and Bifurcations	132
§4.1 Structural Stability	132
§4.2 Ω -stability and Related Topics	136
§4.3 Bifurcations of Planar Systems	141
§4.4 Bifurcations of Toral Trigonometrical Polynomial	
Systems	148
§4.5 Codimensional Bifurcations and Unfoldings	153
§4.6 Bifurcations of Higher Dimensional Systems	158
Exercises	161
Chapter 5	
Chaotic Behavior	164
§5.1 Symbolic Dynamics	164
§5.2 Smale's Horseshoe Map	167
§5.3 Chaotic Behavior of Interval Maps	173
§5.4 Transversal Homoclinic Theorem	178
§5.5 The Melnikov's Method	183
§5.6 Hyperbolic Toral Automorphism	188
§5.7 A Counter-example on Higher Dimensional Manifold	195
Exercises	198

Chapter 6	
Generic Properties	200
§6.1 Genericity of $g_0, g_1(G_0, G_1)$ Properties	200
§6.2 Genericity of g_{12} Property	204
§6.3 Kypka-Smale Theorem	218
§6.4 Genericity of G_{123} Property	226
§6.5 Genericity of g_4, g_5 Properties	231
Exercises	235
References	237
Index	248
