

CONTENTS

Chapter 1. Introduction to dynamic modeling	1
1.1. Modeling drugs in the bloodstream	1
1.2. Jargon	11
1.3. Equilibrium values	17
1.4. Dynamic economic applications	34
1.5. Applications of dynamics using spreadsheets	46
Chapter 2. First-order linear dynamical systems	55
2.1. Solutions to linear dynamical systems with applications	55
2.2. Solutions to an affine dynamical system	68
2.3. An introduction to genetics	71
2.4. Solution to affine dynamical systems with applications	83
2.5. Applications to finance	95
Chapter 3. Probability and dynamical systems	105
3.1. The multiplication and addition principles	105
3.2. Introduction to probability	120
3.3. Multistage tasks	131
3.4. An introduction to Markov chains	143

Chapter 4. Nonhomogeneous dynamical systems	149
4.1. Exponential terms	149
4.2. Exponential terms, a special case	163
4.3. Fractal geometry	167
4.4. Polynomial terms	176
4.5. Polynomial terms, a special case	182
Chapter 5. Higher-order linear dynamical systems	189
5.1. An introduction to second-order linear equations	189
5.2. Multiple roots	199
5.3. The gambler's ruin	203
5.4. Sex-linked genes	209
5.5. Stability for second-order affine equations	213
5.6. Modeling a vibrating spring	223
5.7. Second-order nonhomogeneous equations	231
5.8. Gambler's ruin revisited	241
5.9. A model of a national economy	245
5.10. Dynamical systems with order greater than two	255
5.11. Solutions involving trigonometric functions	262
Chapter 6. Introduction to nonlinear dynamical systems	269
6.1. A model of population growth	269
6.2. Using linearization to study stability	279
6.3. Harvesting strategies	291
Chapter 7. Vectors and matrices	301
7.1. Introduction to vectors and matrices	301
7.2. Rules of linear algebra	309
7.3. Gauss–Jordan elimination	312
7.4. Determinants	321
7.5. Inverse matrices	325
Chapter 8. Dynamical systems of several equations	333
8.1. Introduction to dynamical systems of several equations	333
8.2. Characteristic values	335
8.3. First-order dynamical systems of several equations	349
8.4. Regular Markov chains	356
8.5. Absorbing Markov chains	368

8.6. Applications of absorbing Markov chains	379
8.7. Long-term behavior of systems	386
8.8. The heat equation	396
Bibliography	405
Answers	407
Index	425
