Preface .....	xiii
Preface to the English Edition .....	xv
Introduction .....	xvii

## Chapter 1. Poincare Invariant Nonlinear Scalar Equations

1.1. Nonlinear $n$ -dimensional wave equations invariant under the groups $\tilde{P}(1, n-1)$ , $\tilde{P}(1, n)$ .....	1
1.2. The point and tangent symmetry of the relativistic Hamilton equation .....	5
1.3. The polywave equations invariant under the conformal group .....	10
1.4. Ansätze and reduction of PDEs. The extended Poincare group $\tilde{P}(1,2)$ and its invariants .....	16
1.5. Reduction and exact solutions of the nonlinear d'Alembert equation ..	21
1.6. Reduction and solutions of the Liouville equation .....	28
1.7. Reduction and solutions of d'Alembert equation with nonlinearities $\sin u$ , $\operatorname{sh} u$ .....	32
1.8. Solutions of eikonal equations .....	35
1.9. Symmetry and exact solutions of the Euler-Lagrange-Born-Infeld equation .....	41
1.10. Symmetry and exact solutions of the Monge-Ampere equation .....	47
1.11. Symmetry of the scalar wave equation with interaction .....	51

## Chapter 2. Poincare-Invariant Systems of Nonlinear PDEs

2.1. Reduction and exact solutions of the nonlinear massive Dirac equation .....	55
2.2. Reduction and exact solutions of the nonlinear massless Dirac equation .....	70
2.3. Conformal symmetry and formula of generating solutions for fields .....	

of arbitrary spin. C(1,3)-ungenerative ansätze . . . . .	78
2.4. Conformally invariant nonlinear equations for spinor fields and their solutions . . . . .	91
2.5. Reduction and exact solutions of coupled nonlinear PDEs for spinor and scalar fields . . . . .	98
2.6. Exact solutions of systems of nonlinear equations of quantum electrodynamics . . . . .	102
2.7. On linearization and general solution of two-dimensional Dirac-Heisenberg-Thirring and quantum electrodynamics equations . . . . .	112
2.8. Symmetry analysis of nonlinear equations of classical electrodynamics	117
2.9. Solutions of nonlinear equations for vector fields . . . . .	126
2.10. Some exact solutions of SU(2) Yang-Mills field theory . . . . .	129
2.11. On connection between solutions of Dirac and Maxwell equations, dual Poincare invariance and superalgebras of invariance of Dirac equation . . . . .	141

### **Chapter 3. Euclid and Galilei Groups and Nonlinear PDEs for Scalar Fields**

3.1. The second-order PDEs invariant under the extended Euclid group $\tilde{E}(1, n - 1)$ . . . . .	147
3.2. Reduction and exact solutions of nonlinear PDEs of the type $\square u + F(u, \dot{u})u_0 = 0$ . . . . .	150
3.3. PDEs admitting Galilei algebras . . . . .	163
3.4. The Galilean relativistic principle and nonlinear PDEs . . . . .	169
3.5. Reduction and exact solutions of the nonlinear Schrödinger equation .	176
3.6. Symmetry and some exact solutions of the Hamilton-Jacobi equation .	182
3.7. Symmetry and some exact solutions of the Boussinesq equation . . . . .	188
3.8. Symmetry properties of Fokker-Planck equations . . . . .	193

### **Chapter 4. System of PDEs Invariant Under The Galilei Group**

4.1. The Schrödinger group $Sch(1,3)$ : nonequivalent ansätze and final transformations for fields of arbitrary spin . . . . .	199
4.2. Linear and nonlinear systems of PDEs invariant under the Schrödinger group $Sch(1,3)$ . . . . .	204
4.3. Systems of second-order PDEs invariant under the Galilei group . . . . .	215
4.4. Solutions of the nonlinear Levi-Leblond equation . . . . .	225
4.5. Symmetry analysis of gas dynamics equations . . . . .	229
4.6. The Galilean invariant generalization of the Lame equations. The super-algebra of symmetry of the Lame equations . . . . .	250
4.7. Reduction and exact solutions of nonlinear Galilei-invariant spinor equations . . . . .	254
4.8. Reduction and exact solutions of the Navier-Stokes equation . . . . .	260

## Chapter 5. Some Special Questions

5.1. On nonlocal linearization of nonlinear equations . . . . .	277
5.2. Symmetry, integrals of motion, and some partial solutions of the three-body problem . . . . .	286
5.3. Non-Lie symmetry and nonlocal transformations . . . . .	297
5.4. Lie-Bäcklund symmetry of the Dirac equation . . . . .	310
5.5. Symmetry of integrodifferential equations . . . . .	319
5.6. On exact and approximate solutions of the multidimensional Van der Pol equation . . . . .	323
5.7. Conditional symmetry of PDEs . . . . .	326
5.8. Nonlocal symmetry of quasirelativistic wave equation . . . . .	349
5.9. Are Maxwell's equations invariant under Galilean transformations? . . . . .	353
5.10. Nonlocal spacetime symmetry of the Klein-Gordon equation . . . . .	357
5.11. On solutions of the Schrödinger equation, invariant under the Lorentz algebra . . . . .	358
5.12. On approximate symmetry and approximate solution of the nonlinear wave equation with a small parameter . . . . .	360
<b>Appendix 1. Jacobi elliptic functions . . . . .</b>	<b>364</b>
<b>Appendix 2.</b>	
$\tilde{P}(1,3)$ -nonequivalent one-dimensional subalgebras of the extended Poincare algebra $\tilde{AP}(1,3)$ . . . . .	368
<b>Appendix 3.</b>	
Some applications of Campbell-Baker-Hausdorff operator calculus . . . . .	373
<b>Appendix 4.</b>	
Differential invariants (DI) of Poincare algebras $AP(1,n)$ , $\tilde{AP}(1,n)$ and conformal algebra $AC(1,n)$ . . . . .	387
<b>Appendix 5.</b>	
Differential invariants (DI) of Galilei algebras $AG(1,n)$ , $\tilde{AG}(1,n)$ and Schrödinger algebra $ASch(1,n)$ . . . . .	389
<b>Appendix 6.</b>	
Compatibility and solutions of the overdetermined d'Alembert-Hamilton-system . . . . .	393
<b>Appendix 7. <math>Q</math>-conditional symmetry of the heat equation . . . . .</b>	<b>396</b>
<b>Appendix 8. On nonlocal symmetries of nonlinear heat equation . . . . .</b>	<b>403</b>
<b>References . . . . .</b>	<b>411</b>
<b>Additional References . . . . .</b>	<b>422</b>
<b>Index . . . . .</b>	<b>431</b>
