Preface

1. Nonlinear heat equations

1. Introduction	1
2. Cauchy problem for the n -dimensional heat equation	4
3. Decay estimates for solutions to the Cauchy problem for the n -dimensional homogeneous heat equation	15
4. Some estimates for product functions and composite functions	18
5. Cauchy problem for n -dimensional nonlinear heat equations	36
5.1. Introduction	36
5.2. Metric space $X_{S,E,T}$	37
5.3. Lifespan of classical solutions to Cauchy problem (5.1)-(5.2)	39
6. Case that the nonlinear term F does not explicitly depend on u	52
6.1. Introduction and preliminaries	52
6.2. Metric space $X_{S,E}$	55
6.3. Existence and uniqueness of global classical solutions to Cauchy problem (6.1)-(6.2)	57

2. Nonlinear wave equations

1. Introduction	66
2. Preliminaries	74
2.1. Commutation relations	75
2.2. Commutativity with the wave operator	79
2.3. Sololev embedding theorem on the unit sphere	81
2.4. An estimate on the L^2 norm of the solution to wave equations	82
3. A decay estimate	87
4. Some estimates for product functions and composite functions (continued)	96
5. Cauchy problem for n -dimensional linear wave equations	105
6. Cauchy problem for quasilinear wave equations	128
6.1. Introduction	128
6.2. Metric space $X_{S,E,T}$	129

CONTENTS

6.3 Lifespan of classical solutions to Cauchy problem (6.1)–(6.2)	132
7. Case that the nonlinear term F depends explicitly on u	145
7.1 Introduction	145
7.2 Metric space $X_{S,E,T}$	146
7.3 Lifespan of classical solutions to Cauchy problem (7.1)–(7.2)	147
8. Cauchy problem for nonlinear wave equations	158
3. Nonlinear Schrödinger equations	
1. Introduction	162
2. Cauchy problem for linear Schrödinger equations	164
3. Decay estimates for solutions to the Cauchy problem for the n -dimensional homogeneous Schrödinger equation	176
4. Cauchy problem for n -dimensional quasilinear Schrödinger equations	181
4.1 Introduction	181
4.2 Metric space $X_{S_0,S,E,T}$	182
4.3 Lifespan of classical solutions to Cauchy problem (4.1)–(4.2)	183
5. Cauchy problem for general n -dimensional quasilinear Schrödinger equations	195
Bibliography	198
