## 1 Falling off the straight and narrow

*Our approach and the plan of the book*  1  
*Which medical treatment should I choose?*  3  
*Is this person guilty or innocent?*  6  
*How should I invest my money?*  9  
*Summary*  13

## 2 Decision quality and an historical context

*Intuitions about decision quality*  15  
*A formal approach to decision quality*  16  
*A brief history of judgment and decision research*  19  
*Summary*  24

## 3 Stages of judgment I: Discovering, acquiring and combining information

*Conceptualizing judgment: The lens model*  26  
*Discovering information*  27  
*Acquiring information*  30  
*Combining information*  34  
*Summary*  45

## 4 Stages of judgment II: Feedback effects and dynamic environments

*Learning from feedback*  47  
*Feedback or feedforward?*  50
5 Appraising probability judgments

Correspondence vs. coherence criteria 61
Bayesian model of probability updating 66
Summary 70

6 Judgmental heuristics and biases

Attribute substitution and natural assessments 71
Errors of coherence 72
Support theory 78
Errors of correspondence 80
The frequency effect 85
Summary 89

7 Associative thinking

Associative theories of probability judgment 91
Extending the associative model 93
Associative thinking and mental simulation 98
Summary 101

8 Analysing decisions I: A general framework

A framework for analysing decisions 103
The axioms of expected utility theory 107
Summary 114

9 Analysing decisions II: Prospect theory and preference reversals

Reference-dependence 115
The four-fold pattern 119
Framing 123
Preference reversals 126
Compatibility and evaluability 128
Effect of experience on preference reversals 131
Summary 133

10 Decisions across time

Hindsight and other time-related biases 136
Predicting pleasure and pain 139
Direct effects of time 141
Discount rates 145
Anticipated emotions 147
Summary 151

11 Learning to choose, choosing to learn 153

Probability matching 156
The linear model 158
Choice rules 165
Summary 167

12 Optimality, expertise and insight 169

How close can a decision maker get to optimality? 169
Limitations of the linear model 173
Exemplar theories 176
Search, expertise and insight 178
Summary 183

13 Emotional influences on decision making 185

Decisions and emotions 186
The affect heuristic and risk as feelings 187
Imagery, affect and decisions 189
Summary 193

14 Group decision making 195

Intellective and judgment tasks 196
Achieving a consensus 198
Groupthink: Model and evidence 201
Summary 204

15 Going straight: The view from outside the laboratory 205

Individual techniques for improving decision making 205
Cultural techniques for improving decision making 209
Tools for improving decision making 211
Summary 214
