|--|-----|
| Acknowledgements | iii |
| Table of Contents | iv |
| List of Tables | vi |
| List of Figures | vii |
| List of Formulae | vii |
| Chapter One Introduction | 1 |
| 1.0 Introduction | 1 |
| 1.1 Aims | 3 |
| 1.2 Structure | 4 |
| 1.3 Summary | 4 |
| Chapter 2 BFSI and the Identification of Parameters | 6 |
| 2.0 Introduction | 6 |
| 2.1 Bayesian Forensic Speaker Identification | 6 |
| 2.1.1 A simple example using a non-acoustic parameter. | 7 |
| 2.1.2 Interpretation of the LR | 8 |
| 2.1.3 An example using continuous acoustic data | 9 |
| 2.2 Acoustic Parameters for BFSI analysis | 10 |
| 2.2.1 Formant-based analysis | 10 |
| 2.2.2 The Cepstrum | 13 |
| 2.2.3 Criteria for Parameters | 14 |
| 2.3 The data for the analysis | 15 |
| 2.4 Summary | 17 |
| Chapter 3 Bayes' Theorem and the Likelihood Ratio | 18 |
| 3.0 Introduction | 18 |
| 3.1 Bayes' theorem, and the Bayesian approach to the evaluation of evidence | 18 |
| 3.2 Lindley's formula and the assumption of normality | 20 |
| 3.3 Aitken on kernel density estimation as a way of accounting for non-normality | 22 |
| 3.4 The Importance of the Reference Sample | 25 |
| 3.5 Summary | 26 |
| Chapter 4 Parametric Characterisation of the Background Distribution | 27 |
| 4.0 Introduction | 27 |
| 4.1 The Normal Distribution | 28 |
| 4.1.1 Parameters of the normal distribution | 28 |
| 4.1.2 Features of the normal distribution | 29 |
| 4.1.3 Probability and the normal distribution | 29 |
| 4.2 Parameters of deviation from normality | 30 |
| 4.3 Quantifying the magnitude of deviation from normality | 33 |
| 4.4 Summary | 35 |
| Chapter 5 Australian English and the Bernard Data Set | 36 |
| 5.0 Introduction | 36 |
| 5.1 Australian English | 36 |
| 5.1.1 The Australian English Vowel System | 36 |
| 5.1.2 Australian English and Accent Types | 38 |
| 5.2 The Reference Sample – the Bernard Data Set | 39 |
| 5.3 Summary | 40 |

| | |
|--|-----|
| Chapter 6 Descriptive Statistics of the Bernard Data..... | 41 |
| 6.0 Introduction..... | 41 |
| 6.1 Description of the Bernard data. | 41 |
| 6.2 Summary..... | 46 |
| Chapter 7 The Test Sample..... | 47 |
| 7.0 Introduction..... | 47 |
| 7.1 Collecting the test sample..... | 47 |
| 7.1.0 Some criteria used in construction of the test sample..... | 47 |
| 7.1.1 Data collection and structure..... | 48 |
| 7.1.2 Recording and Analysis..... | 48 |
| 7.2 Results – the Test Samples..... | 51 |
| 7.3 Summary..... | 60 |
| Chapter 8 Speaker Discrimination Results..... | 61 |
| 8.0 Introduction..... | 61 |
| 8.1 Testing and Results..... | 61 |
| 8.1.1 Combining LRs..... | 70 |
| 8.2 Lindley vs. Aitken: evaluating the differences..... | 72 |
| 8.3 Summary..... | 74 |
| Chapter 9 Summary and Way Ahead..... | 76 |
| 9.1 Aims..... | 76 |
| 9.1.1 Aim 1..... | 76 |
| 9.1.2 Aim 2..... | 77 |
| 9.1.3 Aim 3..... | 78 |
| 9.2 The way ahead..... | 79 |
| Appendices..... | 80 |
| Appendix 1 Sentences used to elicit vowel tokens..... | 80 |
| Appendix 2 The Bernard Data..... | 81 |
| Appendix 2.1 Descriptive statistics of the Bernard data by accent type groups..... | 81 |
| Appendix 2.2 Individual Observations in the Bernard Data..... | 83 |
| Appendix 3 Observations in the test data..... | 109 |
| Appendix 4 LR test results for individual parameters..... | 119 |
| Appendix 4.1 LRs using the Lindley formula..... | 119 |
| 4.1.1 Same-speaker LRs..... | 119 |
| 4.1.2 Different-speaker LRs..... | 120 |
| Appendix 4.2 LRs using the Aitken formula..... | 130 |
| 4.2.1 Same-speaker LRs..... | 130 |
| 4.2.2 Different-Speaker LRs..... | 131 |
| References..... | 141 |
