**Preface** ix

**Introduction** 1

**1 Coordinate systems 5**

- 1.1 Coordinates on a straight line 6
- 1.2 Coordinates in the plane 9
- 1.3 Coordinates in  $R^n$  14
- 1.4 Summary 17
- 1.5 Further reading 18

**2 Differential manifolds 19**

- 2.1 Local concepts 19
- 2.2 Local maps 20
- 2.3 Differentiability on an arbitrary subset of  $R^n$  21
- 2.4 Diffeomorphisms 23
- 2.5 Equivalence of sets 24
- 2.6 Subspace topology on a subset of  $R^n$  25
- 2.7 Local diffeomorphisms 25
- 2.8 Local charts 26
- 2.9 Differential submanifolds in  $R^n$  27
- 2.10 Examples of differential submanifolds 29
- 2.11 Tangent spaces 34
- 2.12 Examples for tangent spaces 36
- 2.13 Differential manifolds 38
- 2.14 Summary 40
- 2.15 Further reading 40

**3 The inverse function theorem 42**

- 3.1 Derivatives of inverse functions and implicit functions 42
- 3.2 The inverse function theorem 43
- 3.3 The implicit function theorem 46
- 3.4 The surjective mapping theorem 49
- 3.5 The injective mapping theorem 49

## Contents

|          |   |           |
|----------|---|-----------|
| 3.6      | Summary   | 50        |
| 3.7      | Further reading   | 51        |
| <b>4</b> | <b>Canonical local representatives</b>                          | <b>52</b> |
| 4.1      | Linear maps   | 52        |
| 4.2      | Local representatives   | 57        |
| 4.3      | Local diffeomorphisms   | 59        |
| 4.4      | Submersions   | 61        |
| 4.5      | Immersions  | 62        |
| 4.6      | Summary   | 63        |
| 4.7      | Further reading   | 64        |
| <b>5</b> | <b>Differential manifolds in practice</b>                       | <b>65</b> |
| 5.1      | The preimage theorem  | 65        |
| 5.2      | Tangent spaces of fibers  | 68        |
| 5.3      | Summary   | 71        |
| 5.4      | Further reading   | 71        |
| <b>6</b> | <b>Differential calculus on manifolds</b>                       | <b>72</b> |
| 6.1      | Differentiation through local extension                         | 72        |
| 6.2      | Differentiation through local representatives                   | 73        |
| 6.3      | Differentiation in practice                                     | 74        |
| 6.4      | Existence theorems  | 76        |
| 6.5      | An example  | 77        |
| 6.6      | Preimages and embedded images                                   | 78        |
| 6.7      | Partial converses of the preimage theorem                       | 80        |
| 6.8      | Summary   | 81        |
| 6.9      | Further reading   | 82        |
| <b>7</b> | <b>Canonical representatives of the elementary catastrophes</b> | <b>83</b> |
| 7.1      | The projection of a manifold onto a subspace                    | 83        |
| 7.2      | Critical points and critical values of projections              | 83        |
| 7.3      | The seven canonical representatives                             | 84        |
| 7.4      | The fold  | 85        |
| 7.5      | The cusp  | 86        |
| 7.6      | The swallowtail   | 89        |
| 7.7      | The butterfly and the umbilics                                  | 92        |
| <b>8</b> | <b>Geometric analysis of the umbilics and the butterfly</b>     | <b>93</b> |
| 8.1      | The hyperbolic umbilic  | 93        |
| 8.2      | The elliptic umbilic  | 98        |
| 8.3      | The butterfly   | 103       |
| 8.4      | The parabolic umbilic   | 111       |
| 8.5      | Further reading   | 125       |

|           |  |            |
|-----------|--|------------|
| <b>9</b>  | <b>Germs of mappings</b>                                   | <b>126</b> |
| 9.1       | Function spaces  | 126        |
| 9.2       | Function algebras  | 128        |
| 9.3       | The spaces and algebras $C^r$                              | 129        |
| 9.4       | A useful function  | 130        |
| 9.5       | Map germs  | 132        |
| 9.6       | Vector spaces and algebras of map germs                    | 133        |
| 9.7       | Summary  | 135        |
| 9.8       | Further reading  | 136        |
| <b>10</b> | <b>Jets</b>  | <b>137</b> |
| 10.1      | Approximation  | 137        |
| 10.2      | Taylor expansions  | 138        |
| 10.3      | Strange Taylor series                                      | 140        |
| 10.4      | Jets   | 141        |
| 10.5      | Jet spaces   | 143        |
| 10.6      | Jet extensions   | 144        |
| 10.7      | Summary  | 145        |
| 10.8      | Further reading  | 146        |
| <b>11</b> | <b>Generic properties</b>                                  | <b>147</b> |
| 11.1      | Sets of measure zero                                       | 148        |
| 11.2      | Measure zero sets on a manifold                            | 151        |
| 11.3      | Fubini's theorem   | 152        |
| 11.4      | The mini-Sard theorem                                      | 155        |
| 11.5      | Sard's theorem   | 156        |
| 11.6      | Generic properties   | 158        |
| 11.7      | Summary  | 161        |
| 11.8      | Further reading  | 161        |
| <b>12</b> | <b>The Whitney topologies</b>                              | <b>163</b> |
| 12.1      | Metrics on a function space                                | 164        |
| 12.2      | Pseudo-metrics on a function space                         | 166        |
| 12.3      | The Whitney $C^k$ -topologies                              | 171        |
| 12.4      | The Whitney $C^\infty$ -topology                           | 172        |
| 12.5      | Topologizing $C^\infty(N, P)$                              | 174        |
| 12.6      | Germ spaces  | 175        |
| 12.7      | Summary  | 176        |
| 12.8      | Further reading  | 177        |
| <b>13</b> | <b>Transversality</b>                                      | <b>178</b> |
| 13.1      | Transversality of submanifolds                             | 178        |
| 13.2      | Transversality of a mapping and a submanifold of its range | 182        |
| 13.3      | The preimage of a transverse submanifold                   | 186        |
| 13.4      | Transversality and the combination of independent systems  | 187        |

## **Contents**

- 13.5 Smooth families and their members 189
- 13.6 Jet bundles 193
- 13.7 Thom's transversality theorem 196
- 13.8 Summary 204
- 13.9 Further reading 205

### **14 Structural stability 206**

- 14.1 Left-right equivalence 207
- 14.2 Right equivalence 211
- 14.3 Structural stability of linear maps 212
- 14.4 Nonsingular behavior is structurally stable 214
- 14.5 Singularities 216
- 14.6 Morse functions 221
- 14.7 The nice dimensions 234
- 14.8 Summary 235
- 14.9 Further reading 236

### **Appendix: Basic concepts 238**

- A.1 Sets 238
- A.2 Maps 239
- A.3 The algebra and topology of real  $n$ -space 242
- A.4 General topology 244
- A.5 Differential calculus 247
- A.6 References 251

### **Selected bibliography 252**

### **Index 259**
