PREFACE

INTRODUCTION

<u>CHAPTER I</u> - THE ALGEBRA $M(\mathbb{T})$	1
1. Basic definitions	1
2. Generalized characters	4
3. Generalized Riesz products	7
4. Idempotents in Δ and decompositions of $M(\mathbb{T})$..	11
5. Dirichlet measures	12
<u>CHAPTER II</u> - SPECTRAL THEORY OF UNITARY OPERATORS	15
1. Representation theorem of unitary operators	15
2. Simple spectrum	20
3. Spectral decomposition theorems	22
4. Eigenvalues and discrete spectrum	30
<u>CHAPTER III</u> - SPECTRAL THEORY OF DYNAMICAL SYSTEMS	35
1. Ergodicity	35
2. Ergodic theorems	38
3. Purity laws and D-ergodicity	40
4. Ergodic discrete systems	44
5. Mixing properties	47
6. Example	55
<u>CHAPTER IV</u> - DYNAMICAL SYSTEMS ASSOCIATED TO SEQUENCES ...	60
1. Topological dynamical systems	60
2. Systems associated to sequences taking values in a finite set	69
3. Spectral properties of sequences	73
<u>CHAPTER V</u> - DYNAMICAL SYSTEMS ARISING FROM SUBSTITUTIONS .	87
1. Definitions and notations	87
2. Minimality of the topological system	89

3. ζ -matrix. Positive matrices	90
4. Unique ergodicity of the system $(X(\zeta), T)$	95
5. Matrices M_ζ	100
6. Complexity and topological entropy	104
7. Recognizability property	108

CHAPTER VI - EIGENVALUES OF SUBSTITUTION DYNAMICAL SYSTEM.

1. $\zeta(X)$ -induced transformation	110
2. Eigenvalues of an admissible substitution of constant length	116
3. Eigenvalues of an admissible substitution of non-constant length	125
4. Discrete substitution of constant length	132
5. Open problems	136

CHAPTER VII - MATRICES OF MEASURES

1. Reduction to the matrix Σ	144
2. Matrices of measures	151
3. Characters on a matrix of measures	156

CHAPTER VIII - MATRIX RIESZ PRODUCTS

1. Σ as matrix Riesz product	160
2. Examples of maximal spectral type	164
3. Commutative automata	169

CHAPTER IX - BIJECTIVE AUTOMATA OR SUBSTITUTIONS

1. Structure of bijective substitution systems ...	175
2. Spectral study of bijective substitutions	180

CHAPTER X - MAXIMAL SPECTRAL TYPE OF GENERAL AUTOMATA ..

1. Coincidence matrix	190
2. Projection operator P	195
3. Matrix of correlation measures Z	200
4. Main theorem	205

CHAPTER XI - SPECTRAL MULTIPLICITY OF GENERAL AUTOMATA ...

1. The convex set K	210
2. Spectral multiplicity of substitutions of constant length	216
3. More about spectral multiplicity	224

<u>APPENDIX</u> - COMPACT AUTOMATA	225
<u>BIBLIOGRAPHY</u>	231
<u>INDEX</u>	239
