

C O N T E N T S

CHAPTER 1 INTRODUCTION

1.1 BASIC CONCEPTS, NOMENCLATURE AND CLASSIFICATION	1
1.2 DYNAMIC VARIABLES AND COEFFICIENTS	17

CHAPTER 2 LUMPED PROCESSES 25

A. BASIC PROCESSES

2.1 MASS STORAGE	27
2.1-1 LIQUID STORAGE TANKS	27
E. 1 Controlled inflow and outflow of liquid	27
E. 2 Free outflow of liquid	30
E. 3 The tank under pressure	34
E. 4 Tank with variable cross-sectional area	36
E. 5 Tank with variable cross-sectional area	38
2.1-2 GAS AND STEAM STORAGE TANKS	44
E. 1 Controlled charge and free discharge of tanks	45
POSSIBILITIES OF MASS STORAGE. CAPACITANCE C.	55
E. 2 Outflow of gas. Calculation of time constant T	56
E. 3 Outflow of air under supercritical conditions	58
E. 4 Linearity of gas (steam) outflow from tank	59
E. 5 Charge and discharge of tank due to pressure difference	61
2.2 FLUID FLOW	64
2.2-1 LIQUID FLOW	65
E. 1 Dynamics of liquid flow through pipes	66
E. 2 Calculation of dynamic coefficients. R, I, T	72
E. 3 Calculation of dynamic coefficients. R, I, T	74
2.2-2 GAS AND STEAM FLOW	75

E. 1 Dynamics of gas or steam flow. Boundary conditions	75
E. 2 Calculation of dynamic coefficients. R, C, T	82
 2.2-3 FLUID FLOW	 83
E. 1 Dynamics of fluid flow. Periodic processes	84
E. 2 Calculation of dynamic coefficients. R, I, C, T, ω , Z	93
 2.3 HEAT PROCESSES	 96
E. 1 Heat transfer through a wall	97
E. 2 Radiation heat transfer	102
E. 3 Direct heat exchanger	105
 2.4 MECHANICAL PROCESSES	 109
E. 1 Translation dynamics	112
E. 2 Duality of dynamic variables and coefficients in mechanics	121
E. 3 Dynamic models of different mechanical systems	125
E. 4 Dynamics of a composed mechanical system. Stability of moving pendulum equilibrium state	131
 B. COMPLEX SYSTEMS OF HIGHER ORDER	 139
 2.5 EXAMPLES OF COMPLEX SYSTEMS	 139
E. 1 Three liquid tanks in series	140
E. 2 Two-phase fluid tank	143
E. 3 Gear train system	148
E. 4 Discretization of distributed process	152
 CHAPTER 3 DISTRIBUTED PROCESSES	 158
 3.1 MASS AND ENERGY TRANSPORTATION PROCESSES BASIC HYPERBOLIC FIRST-ORDER PARTIAL DIFFERENTIAL EQUATION	 161
 E. 1 Conveyer system for bulk material transport. Time response	 163

E. 2 Fluid flow through uninsulated pipe. Temperature time response	169
E. 3 Dynamics of parallel-flow and counter-flow heat exchangers	173
E. 4 Fluid flow with heat storage in the pipe wall	179
3.2 PROCESSES WITH EQUALIZATION	181
BASIC PARABOLIC PARTIAL DIFFERENTIAL EQUATION	
E. 1 Heat conduction through homogeneous insulated body	182
E. 2 Direct heat exchanger with a thick wall	187
E. 3 Heat conduction through the exchanger wall	190
E. 4 Heat conduction through homogeneous uninsulated body	205
E. 5 Process of diffusion with convection	206
3.3 PROCESSES WITH PERIODIC STATE CHANGES	208
BASIC HYPERBOLIC SECOND-ORDER PARTIAL DIFFERENTIAL EQUATION	
E. 1 Longitudinal vibration of a beam	210
E. 2 Dynamic processes in fluid pipes. Equations of mass, energy and momentum conservation	212
E. 3 Analysis of dynamic properties. Steady state. Linear model	225
E. 4 Calculations of dynamic characteristics of an evaporator	240
APPENDIX	245
DIFFERENTIAL EQUATIONS AND STATE SPACE	245
MODEL LINEARIZATION	258
SELECT FUNCTIONS OF COMPLEX VARIABLE	268
BASIC DYNAMIC PROPERTIES	269
LIST OF SYMBOLS	270
BIBLIOGRAPHY	275
