

Table of Contents

| | |
|--|------------|
| Introduction | 1 |
| Chapter 1 | 5 |
| Non-degeneracy in the perturbation theory of integrable dynamical systems | |
| <i>Helmut Rüssmann</i> | |
| Chapter 2 | 19 |
| Infinite dimensional inverse function theorems and small divisors | |
| <i>J.A.G. Vickers</i> | |
| Chapter 3 | 37 |
| Metric Diophantine approximation of quadratic forms | |
| <i>S.J. Patterson</i> | |
| Chapter 4 | 49 |
| Symbolic dynamics and Diophantine equations | |
| <i>Caroline Series</i> | |
| Chapter 5 | 69 |
| On badly approximable numbers, Schmidt games and bounded orbits of flows | |
| <i>S. G. Dani</i> | |
| Chapter 6 | 87 |
| Estimates for Fourier coefficients of cusp forms | |
| <i>S. Raghavan and R. Weissauer</i> | |
| Chapter 7 | 103 |
| The integral geometry of fractals | |
| <i>K. J. Falconer</i> | |
| Chapter 8 | 117 |
| Geometry of algebraic continued fractals | |
| <i>J. Harrison</i> | |
| Chapter 9 | 137 |
| Chaos implies confusion | |
| <i>Michel Mendes France</i> | |
| Chapter 10 | 153 |
| The Riemann hypothesis and the Hamiltonian of a quantum mechanical system | |
| <i>J. V. Armitage</i> | |
