Contents

Introduction vii

Ten Problems
V. I. ARNOLD 1

Topology of Complements to Discriminants and Loop Spaces
V. A. VASSILIEV 9

Cohomology of Knot Spaces
V. A. VASSILIEV 23

Nonlinear Generalization of the Maslov Index
A. B. GIVENTAL 71

Singularities of Light Hypersurfaces and Structure of Hyperbolicity Sets for Systems of Partial Differential Equations
B. A. KHESIN 105

Degree of Smoothness for Visible Contours of Convex Hypersurfaces
I. A. BOGAEVSKY 119

Real Vanishing Inflections and Boundary Singularities
YU. M. BARYSHNIKOV 129

Indices for Extremal Embeddings of 1-Complexes
YU. M. BARYSHNIKOV 137

Bifurcation of Flattenings and Schubert Cells
M. E. KAZARIAN 145

Projections of Generic Surfaces with Boundaries
V. V. GORYUNOV 157

Generating Ideals of Lagrangian Varieties
V. M. ZAKALYUKIN 201

Nonisolated Hypersurface Singularities
A. G. ALEKSANDROV 211

Structure of Uniform Estimates in Partial Phase Deformation
V. N. KARPUSHKIN 247

On the Stratification and Singularities of the Stokes Hypersurface of One- and Two-Parameter Families of Polynomials
V. P. KOSTOV 251

Euler Characteristics for Links of Schubert Cells in the Space of Complete Flags
B. Z. SHAPIRO and A. D. VAINSHTEIN 273

Weierstrass Preparation Theorem for Finitely Smooth Modules
V. I. BAKHTIN 287

Singularities for Projections of Integral Manifolds with Applications to Control and Observation Problems
A. N. SHOSHITAISHVILI 295
