Preface

Chapter 1	Introduction	1
Chapter 2	Writing Differential Equations	4
	2-1 Introduction	4
	2-2 Mechanical Systems	4
	2-3 Hydraulic Systems	18
	2-4 Electric Systems	21
	2-5 A Thermal System	25
	2-6 An Ecological System	26
	2-7 A Political-Military System	29
	2-8 Conclusion	30
	<i>Problems</i>	30
Chapter 3	Solving Differential Equations	40
	3-1 Introduction	40
	3-2 Solution of Homogeneous Equations	43
	3-3 Consideration of Initial Conditions	47
	3-4 Solution of Nonhomogeneous Equations	49

	3-5	Transient and Steady-State Responses	52
	3-6	Combining Simultaneous Equations	53
	3-7	Conclusion	53
		<i>Problems</i>	54
Chapter	4	<i>Linear Equations for Modeling Nonlinear Systems</i>	57
	4-1	Introduction	57
	4-2	Examples of Nonlinearities	58
	4-3	Principles of Linearization	62
	4-4	Conclusion	73
		<i>Problems</i>	73
Chapter	5	<i>Introduction to Vibrations</i>	80
	5-1	Introduction	80
	5-2	Basic Principles and Definitions	82
	5-3	Units	88
	5-4	Conclusion	90
		<i>Problems</i>	90
Chapter	6	<i>Free Vibration: Systems with a Single Degree of Freedom</i>	96
	6-1	Introduction	96
	6-2	Undamped Free Vibration	97
	6-3	Damped Free Vibration	104
	6-4	Determination of Damping Ratio from Experimental Data	110
	6-5	Conclusion	112
		<i>Problems</i>	113
Chapter	7	<i>Forced Vibration: Systems with a Single Degree of Freedom</i>	121
	7-1	Introduction	121
	7-2	Examples of Mechanical Vibrating Systems with Sinusoidal Inputs	122
	7-3	Frequency Response	125

	7-4	Vibration Caused by Rotating Unbalance	137
	7-5	Displacement Input Acting Through a Dashpot and Spring in Parallel	141
	7-6	Transmissibility	146
	7-7	Systems with Simultaneous Inputs at Two or More Frequencies	149
	7-8	Conclusion	153
		<i>Problems</i>	156
Chapter	8	More Complex Single-Degree-of-Freedom Systems	166
	8-1	Introduction	166
	8-2	Determining the Degrees of Freedom of a Mechanical System	166
	8-3	Method of Analysis	169
	8-4	Equivalent Inertia, Damping, and Spring Rate	176
	8-5	Conclusion	178
		<i>Problems</i>	179
Chapter	9	Vibrating Systems with More Than One Degree of Freedom	186
	9-1	Introduction	186
	9-2	Writing the Equations of Motion	186
	9-3	Two-Mass System Without Damping	191
	9-4	Two-Mass System with Damping	198
	9-5	Vibrating Systems with More Than Two Degrees of Freedom	202
	9-6	Conclusion	202
		<i>Problems</i>	203
Chapter	10	Distributed Parameter Systems	209
	10-1	Introduction	209
	10-2	Rigorous Analysis of a Distributed Parameter System	211
	10-3	Beams with Other Boundary Conditions	218

10-4	Conclusion	219
	<i>Problems</i>	219

Chapter 11 *Critical Speeds of Rotors* 221

11-1	Introduction	221
11-2	Analysis of a Simple Lumped Parameter Rotor	222
11-3	Effect of Compliance in Bearings and Bearing Mounts	226
11-4	Other Critical Speed Considerations	229
11-5	Similar Rotor Instability Phenomena	234
11-6	Conclusion	235
	<i>Problems</i>	236

Chapter 12 *Balance of Rotors* 242

12-1	Introduction	242
12-2	Static Balance	243
12-3	Dynamic Balance	245
12-4	Conclusion	251
	<i>Problems</i>	252

Chapter 13 *The Feedback Control System* 256

13-1	Introduction	256
13-2	Home Heating Application	257
13-3	Feedback Control Systems	258
13-4	Conclusion	259

Chapter 14 *System Response and Stability* 261

14-1	Introduction	261
14-2	Response of a Liquid-Level System	262
14-3	First-Order System Response to a Step Input	264
14-4	First-Order System Response to a Sinusoidal Input	266

- 14-5 Second-Order System Response 270
- 14-6 Response of Higher-Order Systems
to Simple Sinusoidal Inputs 274
- 14-7 The Concept of System Stability 275
- 14-8 Conclusion 277
Problems 277

Chapter 15 **Control Actions** **284**

- 15-1 Introduction 284
- 15-2 Proportional Control 285
- 15-3 Integral Control 288
- 15-4 Proportional-plus-Integral
Control 291
- 15-5 “Bang-Bang” Control 293
- 15-6 Other Control Actions 297
- 15-7 Conclusion 297
Problems 298

Chapter 16 **Block Diagrams** **303**

- 16-1 Introduction 303
- 16-2 The Transfer Function 304
- 16-3 The Block Diagram 307
- 16-4 Block Diagram Algebra 308
- 16-5 Liquid-Level Integral Control
System Example 314
- 16-6 Systems with Two or More
Inputs 318
- 16-7 Feedback Compensation 321
- 16-8 Conclusion 323
Problems 324

Chapter 17 **State-Variable Formulation and Computer Solutions** **327**

- 17-1 Introduction 327
- 17-2 State-Variable Formulation 328
- 17-3 State-Space Trajectories 334
- 17-4 Analog Computer Solutions 336
- 17-5 Digital Computer Solutions 339
- 17-6 Conclusion 344
Problems 344

Chapter 18	<i>Experimental Determination of System Dynamic Characteristics</i>	348
18-1	Introduction	348
18-2	Test Equipment and Instrumentation	350
18-3	Applying System Inputs	359
18-4	Recording and Interpreting System Response	362
18-5	Conclusion	371
	<i>Problems</i>	372
Appendix A	<i>Deflection of Beams</i>	376
Appendix B	<i>Alternative Mathematical Expressions for Certain Harmonic Functions</i>	380
Appendix C	<i>Solution of Equations</i>	383
Appendix D	<i>Steady-State Solutions by Rotating-Vector and Complex-Number Techniques</i>	386
Appendix E	<i>Rayleigh's Energy Method</i>	394
Appendix F	<i>Decibel Conversion Table</i>	397
Appendix G	<i>Routh's Criterion</i>	398
	<i>Bibliography</i>	401
	<i>Index</i>	403
