

Contents

<i>Preface</i>	iii
<i>Contributors</i>	vii
Shape Control of a Hydrodynamic Wake <i>Jean-Christophe Aguilar and Jean-Paul Zolésio</i>	1
On Some Inverse Geometrical Problems <i>S. Andrieux, A. Ben Abda, and M. Jaoua</i>	11
A Viscosity Solutions Approach to Some Asymptotic Problems in Optimal Control <i>F. Bagagiolo, M. Bardi, and I. Capuzzo Dolcetta</i>	29
Homogenization and Continuous Dependence for Dirichlet Problems in L^1 <i>Lucio Boccardo</i>	41
A Remark on Regularization of the Wave Equation with Boundary Input <i>Francesca Bucci</i>	53
A Pontryagin's Principle for Boundary Control Problems of Quasilinear Elliptic Equations <i>Eduardo Casas</i>	63
Computation of Shape Gradients for Mixed Finite Element Formulation <i>Michel C. Delfour, Zoubida Mghazli, and Jean-Paul Zolésio</i>	77
On a Geometrical Bang-Bang Principle for Some Compliance Problems <i>Michel C. Delfour and Jean-Paul Zolésio</i>	95
Shape Derivative for the Laplace–Beltrami Equation <i>Fabrice Desaint and Jean-Paul Zolésio</i>	111
An Energy Principle for a Free Boundary Problem for Navier–Stokes Equations <i>Raja Dziri and Jean-Paul Zolésio</i>	133
Dynamic Programming Techniques in the Approximation of Optimal Stopping Time Problems in Hilbert Spaces <i>Roberto Ferretti</i>	153

Strong Solutions for Kolmogorov Equation in Hilbert Spaces <i>Fausto Gozzi</i>	163
Sufficient Conditions for Dirichlet Boundary Control Problems of Parabolic Type <i>Fausto Gozzi and Maria Elisabetta Tessitore</i>	189
Shape Hessian for a Nondifferentiable Variational Free Boundary Problem <i>Y. Guido and J. P. Zolésio</i>	205
Carleman Estimates and Exact Boundary Controllability for a System of Coupled, Nonconservative Second-Order Hyperbolic Equations <i>Irena Lasiecka and Roberto Triggiani</i>	215
Static and Dynamic Behavior of a Fluid–Shell System <i>Jean-Paul Marmorat and Jean-Paul Zolésio</i>	245
Inf–Sup Conditions for an Elliptic Operator in the Spaces $W_0^{1,p}$ $W_0^{1,q}$ Approximated with Lagrange Finite Element <i>Jérôme Pousin</i>	259
Numerical Method for Shape Identification Problems <i>Jean Roche and Jan Sokolowski</i>	275
Partial Regularity of Weak Solutions to Certain Parabolic Equations <i>Giulia Sargenti and Vincenzo Vespri</i>	285
Local Regularity Properties of the Minimum Time Function <i>Carlo Sinestrari</i>	293
Some Remarks on the Detectability Condition for Stochastic Systems <i>Gianmario Tessitore</i>	309
Suboptimal Shape of a Plate Stretched by Planar Forces <i>Piero Villaggio and Jean-Paul Zolésio</i>	321
