<b>Preface to the English Edition</b>	<b>ix</b>
<b>Preface to the French Edition</b>	<b>xi</b>
<b>0 Introduction</b>	<b>1</b>
0.1 Brief historical comments . . . . .	1
0.2 Model problem and some examples . . . . .	3
0.3 Presentation of the content of the monograph . . . . .	7
<b>1 Preliminaries</b>	<b>11</b>
1.1 Introduction . . . . .	11
1.2 Continuous and Hölder continuous functions . . . . .	12
1.2.1 Exercises . . . . .	16
1.3 $L^p$ spaces . . . . .	16
1.3.1 Exercises . . . . .	23
1.4 Sobolev spaces . . . . .	25
1.4.1 Exercises . . . . .	38
1.5 Convex analysis . . . . .	40
1.5.1 Exercises . . . . .	43
<b>2 Classical methods</b>	<b>45</b>
2.1 Introduction . . . . .	45
2.2 Euler-Lagrange equation . . . . .	47
2.2.1 Exercises . . . . .	57
2.3 Second form of the Euler-Lagrange equation . . . . .	59
2.3.1 Exercises . . . . .	61
2.4 Hamiltonian formulation . . . . .	61
2.4.1 Exercises . . . . .	68
2.5 Hamilton-Jacobi equation . . . . .	69
2.5.1 Exercises . . . . .	72

2.6	Fields theories . . . . .	72
2.6.1	Exercises . . . . .	77
<b>3</b>	<b>Direct methods</b>	<b>79</b>
3.1	Introduction . . . . .	79
3.2	The model case: Dirichlet integral . . . . .	81
3.2.1	Exercises . . . . .	84
3.3	A general existence theorem . . . . .	84
3.3.1	Exercises . . . . .	91
3.4	Euler-Lagrange equations . . . . .	92
3.4.1	Exercises . . . . .	97
3.5	The vectorial case . . . . .	98
3.5.1	Exercises . . . . .	105
3.6	Relaxation theory . . . . .	107
3.6.1	Exercises . . . . .	110
<b>4</b>	<b>Regularity</b>	<b>111</b>
4.1	Introduction . . . . .	111
4.2	The one dimensional case . . . . .	112
4.2.1	Exercises . . . . .	116
4.3	The model case: Dirichlet integral . . . . .	117
4.3.1	Exercises . . . . .	123
4.4	Some general results . . . . .	124
<b>5</b>	<b>Minimal surfaces</b>	<b>127</b>
5.1	Introduction . . . . .	127
5.2	Generalities about surfaces . . . . .	130
5.2.1	Exercises . . . . .	138
5.3	The Douglas-Courant-Tonelli method . . . . .	139
5.3.1	Exercises . . . . .	145
5.4	Regularity, uniqueness and non uniqueness . . . . .	145
5.5	Nonparametric minimal surfaces . . . . .	146
5.5.1	Exercises . . . . .	151
<b>6</b>	<b>Isoperimetric inequality</b>	<b>153</b>
6.1	Introduction . . . . .	153
6.2	The case of dimension 2 . . . . .	154
6.2.1	Exercises . . . . .	160
6.3	The case of dimension $n$ . . . . .	160
6.3.1	Exercises . . . . .	168

<b>7</b>	<b>Solutions to the Exercises</b>	<b>169</b>
7.1	Chapter 1: Preliminaries . . . . .	169
7.1.1	Continuous and Hölder continuous functions . . . . .	169
7.1.2	$L^p$ spaces . . . . .	170
7.1.3	Sobolev spaces . . . . .	175
7.1.4	Convex analysis . . . . .	179
7.2	Chapter 2: Classical methods . . . . .	184
7.2.1	Euler-Lagrange equation . . . . .	184
7.2.2	Second form of the Euler-Lagrange equation . . . . .	190
7.2.3	Hamiltonian formulation . . . . .	191
7.2.4	Hamilton-Jacobi equation . . . . .	193
7.2.5	Fields theories . . . . .	195
7.3	Chapter 3: Direct methods . . . . .	196
7.3.1	The model case: Dirichlet integral . . . . .	196
7.3.2	A general existence theorem . . . . .	196
7.3.3	Euler-Lagrange equations . . . . .	198
7.3.4	The vectorial case . . . . .	199
7.3.5	Relaxation theory . . . . .	204
7.4	Chapter 4: Regularity . . . . .	205
7.4.1	The one dimensional case . . . . .	205
7.4.2	The model case: Dirichlet integral . . . . .	207
7.5	Chapter 5: Minimal surfaces . . . . .	210
7.5.1	Generalities about surfaces . . . . .	210
7.5.2	The Douglas-Courant-Tonelli method . . . . .	213
7.5.3	Nonparametric minimal surfaces . . . . .	213
7.6	Chapter 6: Isoperimetric inequality . . . . .	214
7.6.1	The case of dimension 2 . . . . .	214
7.6.2	The case of dimension $n$ . . . . .	217
	<b>Bibliography</b>	<b>219</b>
	<b>Index</b>	<b>227</b>
