Contents

Introduction 1

Chapter 1 Semi-Classical Theory 13
1.1 The Maximum Principle 14
1.2 The Bounded Slope Condition 18
1.3 Barriers 22
1.4 The Area Functional 30
1.5 Non-Existence of Minimal Surfaces 32
1.6 Notes and Comments 36

Chapter 2 Measurable Functions 39
2.1 L^p Spaces 39
2.2 Test Functions and Mollifiers 44
2.3 Morrey's and Campanato's Spaces 46
2.4 The Lemmas of John and Nirenberg 54
2.5 Interpolation 61
2.6 The Hausdorff Measure 68
2.7 Notes and Comments 71

Chapter 3 Sobolev Spaces 75
3.1 Partitions of Unity 75
3.2 Weak Derivatives 79
3.3 The Sobolev Spaces $W^{k,p}$ 83
3.4 Imbedding Theorems 90
3.5 Compactness 98
3.6 Inequalities 101
3.7 Traces 106

3.8 The Values of $W^{1,p}$ Functions 110
3.9 Notes and Comments 114

Chapter 4 Convexity and Semicontinuity 119
4.1 Preliminaries 119
4.2 Convex Functionals 121
4.3 Semicontinuity 123
4.4 An Existence Theorem 131
4.5 Notes and Comments 134

Chapter 5 Quasi-Convex Functionals 139
5.1 Necessary Conditions 139
5.2 First Semicontinuity Results 150
5.3 The Quasi-Convex Envelope 155
5.4 The Ekeland Variational Principle 160
5.5 Semicontinuity 162
5.6 Coerciveness and Existence 168
5.7 Notes and Comments 170

Chapter 6 Quasi-Minima 173
6.1 Preliminaries 173
6.2 Quasi-Minima and Differential Quations 175
6.3 Cubical Quasi-Minima 187
6.4 L^p Estimates for the Gradient 197
6.5 Boundary Estimates 206
6.6 Notes and Comments 209

Chapter 7 Hölder Continuity 213
7.1 Caccioppoli's Inequality 213
7.2 De Giorgi Classes 218
7.3 Quasi-Minima 225
7.4 Boundary Regularity 232
7.5 The Harnack Inequality 235
7.6 The Homogeneous Case 242
7.7 ω-Minima 245
7.8 Boundary Regularity 255
7.9 Notes and Comments 257

Chapter 8 First Derivatives 261
8.1 The Difference Quotients 263

8.2 Second Derivatives 266
8.3 Gradient Estimates 271
8.4 Boundary Estimates 274
8.5 ω-Minima 278
8.6 Hölder Continuity of the Derivatives ($p = 2$) 285
8.7 Other Gradient Estimates 288
8.8 Hölder Continuity of the Derivatives ($p \neq 2$) 298
8.9 Elliptic Equations 301
8.10 Notes and Comments 304

Chapter 9 Partial Regularity 307
9.1 Preliminaries 307
9.2 Quadratic Functionals 309
9.3 The Second Caccioppoli Inequality 319
9.4 The Case $F = F(z)$ ($p = 2$) 329
9.5 Partial Regularity 333
9.6 Notes and Comments 342

Chapter 10 Higher Derivatives 347
10.1 Hilbert Regularity 348
10.2 Constant Coefficients 355
10.3 Continuous Coefficients 362
10.4 L^p Estimates 368
10.5 Minima of Functionals 374
10.6 Notes and Comments 375
