

Contents

<i>Preface</i>	vii
<i>Notation and Symbols</i>	ix
Chapter 1 Preliminaries	1
1.1 The Duality Mapping	1
1.2 Compact Mappings in Banach Spaces	5
1.3 Absolutely Continuous Functions with Values in Banach Spaces	9
1.4 Linear Differential Equations in Banach Spaces	17
Chapter 2 Nonlinear Operators of Monotone Type	35
2.1 Maximal Monotone Operators	35
2.2 Generalized Gradients (Subpotential Operators)	57
2.3 Accretive Operators in Banach Spaces	99
Bibliographical Notes and Remarks	123
Chapter 3 Controlled Elliptic Variational Inequalities	125
3.1 Elliptic Variational Inequalities. Existence Theory	125
3.2 Optimal Control of Elliptic Variational Inequalities	148
Bibliographical Notes and Remarks	196
Chapter 4 Nonlinear Accretive Differential Equations	199
4.1 The Basic Existence Results	199
4.2 Approximation and Convergence of Nonlinear Evolutions and Semigroups	240
4.3 Applications to Partial Differential Equations	255
Bibliographical Notes and Remarks	311
Chapter 5 Optimal Control of Parabolic Variational Inequalities	315
5.1 Distributed Optimal Control Problems	315
5.2 Boundary Control of Parabolic Variational Inequalities	342
5.3 The Time-Optimal Control Problem	364

5.4	Approximating Optimal Control Problems via the Fractional Steps Method	389
	Bibliographical Notes and Remarks	404
Chapter 6	Optimal Control in Real Time	407
6.1	Optimal Feedback Controllers	407
6.2	A Semigroup Approach to the Dynamic Programming Equation	433
	Bibliographical Notes and Remarks	456
	<i>References</i>	459
	<i>Subject Index</i>	475
