<b>INTRODUCTION</b>	1
<b>CHAPTER 1 EXISTENCE THEORY IN IDENTIFICATION</b>	4
1.1 Introduction	4
1.2 Existence of Solutions of Linear Evolution Equations	8
1.3 Existence of Optimal Operators	9
1.3.1 Parabolic System	9
1.3.2 Structurally Damped Hyperbolic System	13
1.3.3 Undamped Hyperbolic System	14
1.4 Existence of both Operators and Parameters	16
1.4.1 Parabolic System	18
1.4.2 Structurally Damped Hyperbolic System	19
1.4.3 Undamped Hyperbolic System	19
1.5 Further Generalization of Existence Results	19
1.6 Some Results Based on Semigroup Theory	25
<b>CHAPTER 2 NECESSARY CONDITIONS OF OPTIMALITY</b>	43
2.1 Introduction	43
2.2 Necessary Conditions for optimal Operators	43
2.2.1 Parabolic System	45
2.2.2 Damped Hyperbolic System	48
2.2.3 Undamped Hyperbolic System	49
2.3 Necessary Conditions of Optimality for both Operators and Parameters	52
2.3.1 Parabolic System	52
2.3.2 Damped Hyperbolic System	55
2.3.3 Undamped Hyperbolic System	56
<b>CHAPTER 3 LINEAR AND SEMILINEAR INITIAL BOUNDARY VALUE PROBLEMS</b>	59
3.1 Introduction	59
3.2 Existence of Solutions of Integral Evolution Equations	64
3.3 Existence Theory for Identification	70
3.4 Necessary Conditions of Optimality	74

3.5 A Computational Method	78
3.6 Nonlinear Boundary Value Problems and Relaxed Controls	87
<b>CHAPTER 4 NONLINEAR SYSTEMS</b>	<b>94</b>
4.1 Systems Containing Monotone Operators	94
4.1.1 Nondegenerate Nonlinear Systems	95
Existence Theory in Identification	
Necessary Conditions of optimality	
4.1.2 Degenerate Nonlinear Systems	105
Existence Theory in Identification	
Necessary Conditions of Optimality	
4.2 Systems Containing Accretive Operators	115
4.2.1 Introduction	115
4.2.2 Existence of Solution	119
4.2.3 Identification	127
4.2.4 Necessary conditions of Optimality	130
4.3 Quasilinear Systems	133
<b>CHAPTER 5 STOCHASTIC SYSTEMS</b>	<b>139</b>
5.1 Introduction	139
5.2 Identification of Partially Observed Stochastic Systems	139
5.2.1 Nonlinear Filtering	142
5.2.2 Identification	146
5.3 Linear Filtering and Stochastic Control in Banach Space	154
5.3.1 Introduction	154
5.3.2 Filtering Problem	156
5.3.3 Reformulation of the Filtering Problem as a Dynamic Optimization Problem	157
5.3.4 Filter Equations	161
5.3.5 Partially Observed Stochastic Control	165
<b>CHAPTER 6 COMPUTATIONAL ALGORITHM AND EXAMPLES</b>	<b>170</b>
6.1 Algorithm	170
6.2 Examples	173
Parabolic Systems	
Hyperbolic Systems	
Integral Operators	
Monotone Operators	
Accretive Operators	
<b>REFERENCES</b>	<b>184</b>
