

TABLE OF CONTENTS

Chapter 1	INTRODUCTION	1
1.1	The Object of Study in Abstract Systems Theory	1
1.2	The Subject of the Book	7
1.3	Approach and Issues	8
Chapter 2	BASIC SYSTEMS CONCEPTS VIA FORMALIZATION	12
2.1	Notion of an Abstract System	12
2.2	Cybernetic Structure	16
2.3	Structural Similarity	28
2.3.1	<i>Formulation</i>	28
2.3.2	<i>Elementary Modeling Relation</i>	30
2.4	Behavioral Similarity	36
2.4.1	<i>Formulation</i>	36
2.4.2	<i>General Metrization</i>	38
2.5	Systems Types	40
2.5.1	<i>Time Systems</i>	40
2.5.2	<i>Goal-Seeking Systems</i>	43
Chapter 3	BASIC ATTRIBUTES	44
3.1	State: Internal Representation of Terminal Systems	45
3.1.1	<i>State Object and State Space</i>	45
3.1.2	<i>Existence of Dynamical System Representation</i>	51
3.1.3	<i>Minimal Realization</i>	60
3.2	Causality-Determinism in Systems	64
3.2.1	<i>Concept and Definition of Causality</i>	64
3.2.2	<i>Characterization of Causality and Causal Morphism</i>	67
3.2.3	<i>State Space Representation</i>	79
3.2.4	<i>Causal Ordering</i>	82
3.3	Stationarity - Time-Invariance in Systems	85
3.3.1	<i>Concept and Definitions of Stationarity</i>	85
3.3.2	<i>Characteristics of Stationarity and Stationarity Morphisms</i>	89
3.3.3	<i>Stationarization Procedures and Stationarization Functor</i>	96
3.4	Stability -- Continuity of Systems Behavior	110
3.4.1	<i>Concept and Definition of Stability</i>	110
3.4.2	<i>Characterization of the Lyapunov Type Stability</i>	114
3.5	Feedback -- Transformation of Systems	119

3.5.1	<i>Concept and Formulation of Feedback</i>	119
3.5.2	<i>Issues in Feedback Systems Studies</i>	124
3.6	Controllability -- Ability of Systems to Perform	129
3.6.1	<i>Concept of Controllability</i>	129
3.6.2	<i>Controllability of Time Systems</i>	131
3.7	Consistency and Completeness	135
Chapter 4	STRUCTURED TERMINAL SYSTEMS - CHARACTERIZATION	139
4.1	Preliminary Notions	139
4.1.1	<i>Additional Properties and Classification of Systems</i>	139
4.1.2	<i>Formulation of the Characterization Problem</i>	140
4.2	Finite Automata Type Systems	142
4.2.1	<i>Finite Automata and Time Systems</i>	142
4.2.2	<i>Characterization of Finite Automaton</i>	143
4.2.3	<i>Other Characterizing Conditions</i>	148
4.3	Basic Linear Systems -- Linear Ordinary Differential Equation Systems	150
4.3.1	<i>Concept of Basic Linear System</i>	150
4.3.2	<i>Representation Theory of Basic Linear System</i>	154
4.4	Generalized Basic Linear Systems -- Linear Partial Differential Equation Systems	163
4.4.1	<i>Examples of Linear Partial Differential Equation Systems</i>	163
4.4.2	<i>Definition of Generalized Basic Linear System</i>	172
4.4.3	<i>Finitely Observable Linear Systems</i>	178
Chapter 5	BASIC PROPERTIES OF ABSTRACT TIME SYSTEMS	182
5.1	Uniqueness of Representation	182
5.1.1	<i>Concept of Uniqueness</i>	182
5.1.2	<i>Unique Representation of (Strongly) Stationary Past-Determined System</i>	184
5.1.3	<i>Application to Basic Linear Systems and Generalized Basic Linear Systems</i>	189
5.2	Causal Ordering and Inverse System	190
5.2.1	<i>Causal Ordering</i>	190
5.2.2	<i>Invertability of Basic Linear Systems</i>	203
5.3	Feedback Well-Posedness of Basic Linear Systems	210
5.3.1	<i>Problem Formulation</i>	210

5.3.2	<i>Well-Posedness Condition of Basic Linear Systems</i>	212
5.3.3	<i>Well-Posed Class of Basic Linear Systems</i>	219
5.4	Category of Terminal Systems	221
5.4.1	<i>Category Theory and Systems Theory: General Considerations</i>	221
5.4.2	<i>Categorical Realization Theory of Basic Linear Systems</i>	225
5.4.3	<i>Basic Property of the Category of Basic Linear Systems</i>	245
Chapter 6	GOAL-SEEKING SYSTEM	256
6.1	Analysis of the Goal Seeking Concept	256
6.2	Decision Principles	264
6.3	Characterization of Decision Principles	268
6.4	Application of Satisfaction Decision Principle	295
6.5	Structure of Rational Decision Principles	302
6.5.1	<i>Category of Decision Problems and Category of Ordered Alternatives</i>	302
6.5.2	<i>Decision Principle Functors and Their Properties</i>	305
6.5.3	<i>Realizations of Decision Principle Functor</i>	315
Chapter 7	COMPLEX SYSTEMS	330
7.1	Complex Systems Concept	330
7.1.1	<i>Illustration of Complex Systems Concepts</i>	330
7.1.2	<i>Classification of Complex Systems</i>	332
7.2	Complex Terminal Systems	336
7.2.1	<i>Basic Definitions and Problems of Complex Input/Output Systems</i>	336
7.2.2	<i>General Decomposition Theory</i>	337
7.2.3	<i>Interactions</i>	356
7.2.4	<i>Decoupling of Complex Input-Output System</i>	376
7.3	Hierarchical Goal-Seeking System	386
7.3.1	<i>Concept of Hierarchical Goal Seeking System</i>	386
7.3.2	<i>Coordination</i>	394
7.3.3	<i>Integration of Large-Scale Goal Seeking Systems Theories</i>	406

APPENDIX I	MATHEMATICAL PRELIMINARIES	415
1	Set Theory	417
2	Algebra	426
3	Category Theory	429
4	Topology	432
5	Linear Space	434
6	Others	435
BIBLIOGRAPHY		437
