Preface	iii	
List of Contributors	ix	
Introduction - W. Harmon Ray	1	
PART 1		
FUNDAMENTALS		
1	OPTIMAL CONTROL OF DETERMINISTIC DISTRIBUTED PARAMETER SYSTEMS	9
	Jacques-Louis Lions	
	I. Stationary Systems	10
	II. Evolution Systems	28
	References	41
2	IDENTIFICATION OF PARAMETERS IN DISTRIBUTED SYSTEMS	47
	R. Eugene Goodson and Michael P. Polis	
	I. Introduction	47
	II. Literature Survey and Analysis	50
	III. Specific Results for Distributed System Identification	79
	IV. Discussion	117
	Appendix: Transfer Functions and Infinite Product Approximations	117
	References	122
3	DISTRIBUTED PARAMETER STATE ESTIMATION	135
	Spyros G. Tzafestas	
	I. Introduction	136
	II. Stochastic Distributed Parameter Models	137
	III. A Brief Outline of the Present Survey	139
	IV. Basic Linear Filtering Theory of DPS	141
	V. Smoothing and Prediction	150
	VI. Further Linear Filtering Results	154
	VII. Nonlinear Distributed Parameter State Estimation	158
	VIII. Observability and Optimal Location of Measurement Points	171
	IX. Rigorous Generalized State Estimation Theory	178
	X. Application Examples	185

	XI. Conclusions	197
	References	199
	Supplementary Bibliography	207
4	CONTROL OF STOCHASTIC PARTIAL DIFFERENTIAL EQUATIONS Alain Bensoussan	209
	I. Introduction	210
	II. A Review of Stochastic PDEs	210
	III. Optimal Control of Stochastic PDEs: Case When the Information Does Not Depend on the Control	224
	IV. Optimal Control of Stochastic PDEs: Case When the Information Depends on the Control	228
	V. Control by A Priori Feedback	239
	VI. Miscellaneous Questions	243
	References	245
5	CONTROL AND ESTIMATION OF SYSTEMS WITH TIME DELAYS H. N. Koivo and A. J. Koivo	249
	I. Introduction	250
	II. Optimal Control	256
	III. State Estimation	283
	IV. Optimal Control and Estimation in Stochastic Delayed Systems	308
	V. Conclusions	314
	References	315
6	SECOND-ORDER COMPUTATIONAL METHODS FOR DISTRIBUTED PARAMETER OPTIMAL CONTROL PROBLEMS Kun Soo Chang	321
	I. Introduction	322
	II. Second-order Method of Successive Approximations	331
	III. Second-order Method of Differential Dynamic Programming Approach	357
	IV. Concluding Remarks	370
	References	371
PART 2		
APPLICATIONS		
7	THE CONTROL OF VIBRATING ELASTIC SYSTEMS M. Köhne	387
	I. Introduction	388
	II. System Description	391
	III. Feedback Control of Elastic Systems	404
	IV. State Observers	420
	V. Optimal Linear Feedback Control of Lateral Vibrations of Elastic Hauling Pipes for Deep Sea Mining	432

	VI. Conclusions	452
	References	453
8	FEEDBACK STABILIZATION OF HYDROMAGNETIC EQUILIBRIA P. K. C. Wang and G. Rodriguez	457
	I. Introduction	457
	II. Mathematical Models	458
	III. Feedback Stabilization	479
	IV. Conclusions	492
	References	493
9	IDENTIFICATION OF PETROLEUM RESERVOIR PROPERTIES John H. Seinfeld and Wen H. Chen	497
	I. Introduction	497
	II. Mathematical Description of Petroleum Reservoirs	498
	III. The Parameter Identification Problem	507
	IV. Parameter Identification in Two-phase Reservoirs	526
	V. Conclusions	552
	References	553
10	IDENTIFICATION OF PARAMETERS IN DISTRIBUTED CHEMICAL REACTORS Bruno A. J. Van den Bosch	555
	I. Introduction	555
	II. Gradient Methods	558
	III. Quasilinearization	562
	IV. Orthogonal Collocation	566
	V. Isothermal Laminar-flow Tubular Reactor: An Example	571
	VI. The Joint Confidence Region	576
	VII. Heat Equation: An Example	581
	VIII. Nonlinear Confidence Regions	588
	IX. Conclusions	589
	Notation	591
	References	593
	INDEX	595
