Preface	xi
1 The Laguerre Calculus	1
1.1 The Heisenberg group	1
1.2 The twisted and P.V. convolution operators	2
1.3 Laguerre calculus	6
2 Estimates for Powers of the Sub-Laplacian	33
2.1 Introduction	33
2.2 The powers of the sub-Laplacian	37
2.3 The heat kernel	40
2.4 Estimates of Ψ_m in Hardy spaces	44
2.5 <i>BMO</i> estimates for the operator Ψ_m	55
2.6 The Riesz transforms on H_n	58
2.7 Connection with \mathbb{R}^{2n}	68
3 Estimates for the Spectrum Projection Operators of the Sub-Laplacian	77
3.1 The L^p spectrum of $(\mathcal{L}, i\mathbf{T})$	77
3.2 Estimates for the operator $T_{\mathbf{k},\varepsilon}$ in Morrey spaces	84
3.3 The spectral projection operator	89
3.4 The Schrödinger operator	94
3.5 The fundamental solution of $\Delta_{\lambda,\alpha}$	96
3.6 Estimate $\bar{\partial}_b$ operator in Morrey space	102
Appendix: The Isotropic Heisenberg Group	105
4 Inverse of the Operator $\square_\alpha = \sum_{j=1}^n (\mathbf{X}_j^2 - \mathbf{X}_{j+n}^2) - 2i\alpha\mathbf{T}$	111
4.1 Introduction	111
4.2 Inverting \square_α : symbols	112
4.3 Inverting \square_α : the kernel	124
4.4 Real α : Müller and Ricci's result	135
4.5 The wave equation on the Heisenberg group	139

5	The explicit solution of the $\bar{\partial}$-Neumann problem in a non-isotropic Siegel domain	151
5.1	Introduction	151
5.2	$\bar{\partial}$ operators and $\bar{\partial}$ Laplacian on \mathcal{U}^n	152
5.3	The Laguerre calculus on $H_n \times \mathbb{R}^d$	156
5.4	The Fundamental solution of \square_α	158
5.5	$\bar{\partial}$ -Neumann problem	162
5.6	The associated heat equation	166
5.7	The Laplacian operator on the Heisenberg group	176
6	Injectivity of the Pompeiu Transform in the Isotropic H_n	185
6.1	Introduction	185
6.2	Preliminaries	186
6.3	The group algebras $L^1_0(H_n)$ and $L^1_0(H_n)$	188
6.4	Description of $U(n)$ and \mathbb{T}^n -spherical functions and the spaces \mathfrak{M}^* and \mathfrak{M}	191
6.5	Convolution equations systems with 0 and $\mathbf{0}$ -homogeneous compactly supported Radon measures as coefficients	210
6.6	Pompeiu type theorems in H_n	216
6.7	The interpretation from the point of view of the Weyl functional calculus	223
7	Morera-type Theorems for Holomorphic \mathcal{H}^p Spaces in H_n (I)	229
7.1	Introduction	229
7.2	Boundary analogues of the Morera theorem - A Morera type theorem for CR functions in the class $L^2(H_n)$	234
7.3	A Morera-type theorem for CR functions on the unit ball	247
8	Morera-type Theorems for Holomorphic \mathcal{H}^p Spaces in H_n (II)	257
8.1	m -homogeneous and \mathbf{m} -homogeneous functions on H_n	258
8.2	The subalgebra $L^1_{00}(H_n)$ and convolution equations for \mathbf{m} -homogeneous functions	290
8.3	Morera-type theorems for $\mathcal{H}^p(H_n)$ spaces in H_n	300
8.4	The characterization of $\mathcal{H}^\infty(\partial\mathbb{B}^{n+1})$ via Morera theorems	314
