Preface	ix
List of Participants	xi
Non-uniform sampling in multiply generated shift-invariant subspaces of $L^p(\mathbb{R}^d)$ AKRAM ALDROUBI, QIYU SUN, AND WAI-SHING TANG	1
Multiwavelets, pseudodifferential operators and microlocal analysis RYUICHI ASHINO, CHRISTOPHER HEIL, MICHIIHIRO NAGASE, AND RÉMI VAILLANCOURT	9
A maximum entropy criterion for feature extraction SANKAR BASU, CHARLES A. MICCHELLI, AND PEDER OLSEN	21
Wavelet filters and infinite-dimensional unitary groups OLA BRATTELI AND PALLE E. T. JORGENSEN	35
On the Cohen-type conditions for the stability of shifts of a refinable function G. J. CHAE, H. O. KIM, AND R. Y. KIM	67
Trigonometric Hermite wavelet and natural integral equations for Stokes problem WENSHENG CHEN AND WEI LIN	73
Vision, harmonic oscillator and wavelets DAO-QING DAI	87
Some properties of refinable splines T. N. T. GOODMAN AND S. L. LEE	93
On some applications of a class of totally positive bases LAURA GORI AND FRANCESCA PITOLLI	109
Interpolatory biorthogonal wavelets and CBC algorithm BIN HAN AND SHERMAN D. RIEMENSCHNEIDER	119
Constructing orthogonal refinable function vectors with prescribed approximation order and smoothness DOUGLAS P. HARDIN AND THOMAS A. HOGAN	139

On M-band wavelets having three vanishing moments DAREN HUANG, ZHENWU WANG, AND ZEYIN ZHANG	149
Approximation power of refinable vectors of functions RONG-QING JIA AND QING-TANG JIANG	155
Wavelet decomposition under translate JIN NING	179
Applications of shift-invariant space theory to some problems of multi-resolution analysis of $L^2(\mathbb{R}^d)$ HONG OH KIM AND JAE KUN LIM	183
On the connectedness and classification of self-affine tiles IBRAHIM KIRAT AND KA-SING LAU	193
Wavelet-Galerkin methods for second kind integral equations XUE-ZHANG LIANG AND MING-CAI LIU	207
Convergence of cascade algorithms in $L_p(0 < p < 1)$ SONG LI	217
Asymptotics of zeros of Bernstein polynomials that are related to modified Daubechies wavelets I. YA. NOVIKOV	225
Homogeneous and nonhomogeneous refinable distributions in $F^{q,\gamma}$ QIYU SUN	235
A wavelet transform based face recognition system and its eapplications JINSHAN TANG, SHINJIRO KAWATO, AND JUN OHYA	245
Spline wavelets in numerical resolution of partial differential equations JIANZHONG WANG	257
Basis and convergence properties of wavelet packets MLADEN VICTOR WICKERHAUSER	279
A wavelet-based characterization of curves LIHUA YANG AND YUAN Y. TANG	289
Face processing and recognition technology P. C. YUEN, G. C. FENG, J. H. LAI, AND D. Q. DAI	297
The p -norm joint spectral radius and its applications in wavelet analysis DING-XUAN ZHOU	305
