<b>Preface</b>	<b>xiii</b>
<b>0 Overview of Measure Theory and Functional Analysis</b>	<b>1</b>
0.1 Pre-Basics	1
0.2 A Whirlwind Review of Measure Theory	2
0.3 The Elements of Banach Space Theory	13
0.4 Hilbert Space	21
0.5 Two Fundamental Principles of Functional Analysis	26
<b>1 Fourier Series Basics</b>	<b>31</b>
1.0 The Pre-History of Fourier Analysis	31
1.1 The Rudiments of Fourier Series	42
1.2 Summability of Fourier Series	49
1.3 A Quick Introduction to Summability Methods	55
1.4 Key Properties of Summability Kernels	62
1.5 Pointwise Convergence for Fourier Series	71
1.6 Norm Convergence of Partial Sums and the Hilbert Transform	76
<b>2 The Fourier Transform</b>	<b>95</b>
2.1 Basic Properties of the Fourier Transform	95
2.2 Invariance and Symmetry Properties of the Fourier Transform	98

2.3	Convolution and Fourier Inversion .....	103
2.4	The Uncertainty Principle .....	117
<b>3</b>	<b>Multiple Fourier Series</b> .....	<b>121</b>
3.1	Various Methods of Partial Summation .....	121
3.2	Examples of Different Types of Summation .....	126
3.3	Fourier Multipliers and the Summation of Series .....	130
3.4	Applications of the Fourier Multiplier Theorems to Summation of Multiple Trigonometric Series .....	140
3.5	The Multiplier Problem for the Ball .....	148
<b>4</b>	<b>Spherical Harmonics</b> .....	<b>171</b>
4.1	A New Look at Fourier Analysis in the Plane .....	171
4.2	Further Results on Spherical Harmonics .....	183
<b>5</b>	<b>Fractional Integrals, Singular Integrals, and Hardy Spaces</b> .....	<b>199</b>
5.1	Fractional Integrals and Other Elementary Operators .....	199
5.2	Prolegomena to Singular Integral Theory .....	203
5.3	An Aside on Integral Operators .....	208
5.4	A Look at Hardy Spaces in the Complex Plane .....	209
5.5	The Real-Variable Theory of Hardy Spaces .....	219
5.6	The Maximal-Function Characterization of Hardy Spaces .....	225
5.7	The Atomic Theory of Hardy Spaces .....	227
5.8	Ode to BMO .....	229
<b>6</b>	<b>Modern Theories of Integral Operators</b> .....	<b>235</b>
6.1	Spaces of Homogeneous Type .....	235
6.2	Integral Operators on a Space of Homogeneous Type ...	241
6.3	A New Look at Hardy Spaces .....	262
6.4	The $T(1)$ Theorem .....	266
<b>7</b>	<b>Wavelets</b> .....	<b>273</b>
7.1	Localization in the Time and Space Variables .....	273
7.2	Building a Custom Fourier Analysis .....	276

7.3	The Haar Basis .....	279
7.4	Some Illustrative Examples .....	285
7.5	Construction of a Wavelet Basis .....	297
<b>8</b>	<b>A Retrospective</b>	<b>313</b>
8.1	Fourier Analysis: An Historical Overview .....	313
	<b>Appendices and Ancillary Material</b>	<b>315</b>
	Appendix I, The Existence of Testing Functions and Their Density in $L^p$ .....	315
	Appendix II, Schwartz Functions and the Fourier Transform ..	317
	Appendix III, The Interpolation Theorems of Marcinkiewicz and Riesz-Thorin .....	318
	Appendix IV, Hausdorff Measure and Surface Measure .....	320
	Appendix V, Green's Theorem .....	323
	Appendix VI, The Banach-Alaoglu Theorem .....	323
	Appendix VII, Expressing an Integral in Terms of the Distribution Function .....	324
	Appendix VIII, The Stone-Weierstrass Theorem .....	324
	Appendix IX, Landau's $\mathcal{O}$ and $o$ Notation .....	325
	<b>Table of Notation</b>	<b>327</b>
	<b>Bibliography</b>	<b>339</b>
	<b>Index</b>	<b>347</b>
