- 1. Spaces of Entire Analytic Functions 12**
  - 1.1. Introduction 12**
  - 1.2. Preliminaries I: Ultra-Distributions 14**
    - 1.2.1. Definitions 14
    - 1.2.2. Basic Properties 16
    - 1.2.3. Paley-Wiener-Schwartz Theorems for Ultra-Distributions 18
    - 1.2.4. Distributions 19
  - 1.3. Preliminaries II: Spaces of  $L_p$ -Type and Maximal Inequalities 20**
    - 1.3.1. Basic Spaces and Weighted Spaces 20
    - 1.3.2. Mixed Spaces 21
    - 1.3.3. Maximal Inequalities 23
  - 1.4. Weighted Inequalities of Plancherel-Polya-Nikol'skij Type for  $S_\omega$ -Functions 24**
    - 1.4.1. Admissible Weights and Measures 24
    - 1.4.2. A Maximal Inequality 26
    - 1.4.3. Inequalities for Weights of Type  $R(\omega)$  28
    - 1.4.4. Inequalities for Atomic Measures 29
    - 1.4.5. Inequalities for Measures of Type  $M^h$  and Weights of Type  $K_h(\varrho, \mu)$  30
    - 1.4.6. Complements (A Discussion about Admissible Weights and Measures) 32
  - 1.5. Weighted  $L_p$ -Spaces of Entire Analytic Functions 35**
    - 1.5.1. Definition 35
    - 1.5.2. Inequalities 36
    - 1.5.3. Basic Properties 37
    - 1.5.4. Further Properties 38
    - 1.5.5. Shannon's Sampling Theorem, Isomorphism Properties, and Schauder Bases 41
  - 1.6. Mixed  $L_{\vec{p}}$ -Spaces of Entire Analytic Functions 44**
    - 1.6.1. Definition 44
    - 1.6.2. Inequalities of Nikol'skij Type 44
    - 1.6.3. Properties 47
    - 1.6.4. A Maximal Inequality 47
  - 1.7. Fourier Multipliers for Weighted  $L_p$ -Spaces of Entire Analytic Functions 49**
    - 1.7.1. Introduction and Definitions 49
    - 1.7.2. Basic Multiplier Theorem 51
    - 1.7.3. Convolution Algebras 51
    - 1.7.4. Some Prerequisites: Besov-Sobolev Spaces 52
    - 1.7.5. Special Multiplier Theorem 54
    - 1.7.6. Discrete Multiplier Theorem 56
    - 1.7.7. Comments 58
  - 1.8. Fourier Multipliers for Mixed  $L_{\vec{p}}$ -Spaces of Entire Analytic Functions 59**
    - 1.8.1. Definition and Basic Multiplier Theorem 59
    - 1.8.2. Convolution Algebras 60
    - 1.8.3. Main Multiplier Theorem 60

<b>1.9.</b>	<b>Vector-Valued Weighted <math>L_p</math>-Spaces</b>	<b>63</b>
1.9.1.	The Spaces $L_p^\Omega(\mathbb{R}_n, \varrho(x), l_q)$	63
1.9.2.	The Spaces $L_p(\mathbb{R}_n, \varrho(x), l_q)$	65
1.9.3.	The Spaces $L_p(\mathbb{R}_n, \varrho(x), l_2)$	67
1.9.4.	The Spaces $L_p(\mathbb{R}_n, \varrho(x))$	71
<b>1.10.</b>	<b>Vector-Valued Mixed <math>L_{\vec{p}}</math>-Spaces of Entire Analytic Functions</b>	<b>74</b>
1.10.1.	Definitions	74
1.10.2.	Maximal Inequalities	75
1.10.3.	Fourier Multipliers	77
<b>2.</b>	<b>Spaces with Dominating Mixed Smoothness Properties</b>	<b>80</b>
<b>2.1.</b>	<b>Introduction</b>	<b>80</b>
<b>2.2.</b>	<b>Definitions and Basic Properties</b>	<b>81</b>
2.2.1.	Definitions	81
2.2.2.	Other Types of Spaces	83
2.2.3.	Equivalent Quasi-Norms and Elementary Embeddings	87
2.2.4.	Basic Properties	92
2.2.5.	Fourier Multipliers	95
2.2.6.	Lifting Property and Related Equivalent Quasi-Norms	98
2.2.7.	Maximal Inequalities and Equivalent Quasi-Norms	100
<b>2.3.</b>	<b>Representations and Special Cases</b>	<b>102</b>
2.3.1.	Bessel-Potential and Sobolev Spaces with a Dominating Mixed Derivative	102
2.3.2.	Representations of Nikol'skij-Type	105
2.3.3.	Characterizations of $S_{\vec{p}, \vec{q}}^f F$ by Differences	108
2.3.4.	Characterizations of $SB_{\vec{p}, \vec{q}}^f$ and $S_{\vec{p}, \vec{q}}^f B$ by Differences	118
<b>2.4.</b>	<b>Embedding Theorems</b>	<b>127</b>
2.4.1.	Embedding Theorems for Different Metrics	127
2.4.2.	Traces	133
<b>2.5.</b>	<b>Notes and Comments</b>	<b>136</b>
2.5.1.	Mapping Properties of Integral Operators	136
2.5.2.	Approximation	139
2.5.3.	Vector-Valued Besov Spaces	140
2.5.4.	Interpolation	140
2.5.5.	Further Properties	141
2.5.6.	Further Spaces	141
<b>3.</b>	<b>Periodic Spaces</b>	<b>142</b>
<b>3.1.</b>	<b>Introduction</b>	<b>142</b>
<b>3.2.</b>	<b>Preliminaries</b>	<b>142</b>
3.2.1.	Distributions on $T_n$	142
3.2.2.	Fourier Coefficients and Fourier Series	143

3.2.3.	Periodic Distributions on $R_n$	144
3.2.4.	Maximal Inequalities	145
<b>3.3.</b>	<b>Basic Inequalities and Multipliers for Trigonometric Polynomials</b>	<b>146</b>
3.3.1.	Trigonometric Polynomials	146
3.3.2.	Nikol'skij's Inequality	147
3.3.3.	Convolution Inequalities	149
3.3.4.	Fourier Multipliers	150
3.3.5.	Maximal Inequalities	152
<b>3.4.</b>	<b>Vector-Valued <math>L_p</math>-Spaces of Periodic Functions</b>	<b>153</b>
3.4.1.	Maximal Inequalities and Fourier Multipliers	153
3.4.2.	Fourier Multipliers for $L_p(T_n, l_q)$ , $1 < p < \infty$ , $1 < q < \infty$	155
3.4.3.	Special Multipliers for $L_p(T_n, l_q)$ , $1 < p < \infty$ , $1 < q < \infty$	157
3.4.4.	The Spaces $L_p(T_n)$ , $1 < p < \infty$	160
<b>3.5.</b>	<b>The Spaces <math>B_{p,q}^s(T_n)</math> and <math>F_{p,q}^s(T_n)</math></b>	<b>162</b>
3.5.1.	Definitions and Basic Properties	162
3.5.2.	The Spaces $F_{\infty,q}^s(T_n)$	165
3.5.3.	Lizorkin Representations	166
3.5.4.	Periodic Besov and Sobolev-Lebesgue Spaces	167
3.5.5.	Embedding Theorems for Different Metrics	169
3.5.6.	Dual Spaces	171
3.5.7.	Remarks on Further Properties	172
<b>3.6.</b>	<b>Complex Interpolation and Fourier Multipliers</b>	<b>172</b>
3.6.1.	Real and Complex Interpolation	172
3.6.2.	Complex Interpolation for the Spaces $B_{p,q}^s(T_n)$ and $F_{p,q}^s(T_n)$	174
3.6.3.	Fourier Multipliers for $B_{p,q}^s(T_n)$ and $F_{p,q}^s(T_n)$	176
3.6.4.	Fourier Multipliers for $L_p^A(T_n, l_q)$	177
<b>3.7.</b>	<b>Approximation and Strong Summability</b>	<b>178</b>
3.7.1.	Characterizations of $B_{p,q}^s(T_n)$ and $F_{p,q}^s(T_n)$ by Approximation	178
3.7.2.	Approximation by Partial Sums and Smooth Means	181
3.7.3.	Strong Summability of Partial Sums	185
3.7.4.	Strong Summability of Smooth Means	190
<b>3.8.</b>	<b>Remarks</b>	<b>195</b>
3.8.1.	Periodic Spaces and Weighted Spaces	195
3.8.2.	Periodic Spaces and Abstract Spaces	195
<b>4.</b>	<b>Anisotropic Spaces</b>	<b>196</b>
<b>4.1.</b>	<b>Introduction</b>	<b>196</b>
<b>4.2.</b>	<b>Definition and Preliminaries</b>	<b>196</b>
4.2.1.	Definitions	196
4.2.2.	Equivalent Norms	198
4.2.3.	Embeddings and Traces	199
4.2.4.	Interpolation and Duality	201

<b>4.3.</b>	<b>Anisotropic Inequalities of Hardy Type</b>	202
4.3.1.	Inequalities in One Dimension	202
4.3.2.	Inequalities in Two Dimensions	204
<b>4.4.</b>	<b>The Spaces <math>\dot{B}_p^{\dot{s}}(R_2)</math> and <math>\dot{W}_p^{\dot{s}}(R_2)</math></b>	208
4.4.1.	The System $\Psi^{\dot{a}}(R_2)$ , an Inequality	208
4.4.2.	The Spaces $\dot{B}_p^{\dot{s}}(R_2)$ and $\dot{W}_p^{\dot{s}}(R_2)$ with $s > 0$ and $\dot{s}$ Non-Critical	210
4.4.3.	The Spaces $\dot{B}_p^{\dot{s}}(R_2)$ and $\dot{W}_p^{\dot{s}}(R_2)$ , the General Case	211
4.4.4.	Properties of the Spaces $\dot{B}_p^{\dot{s}}(R_2)$	214
<b>4.5.</b>	<b>Traces of <math>\dot{B}_p^{\dot{s}}(R_2)</math> and <math>\dot{W}_p^{\dot{s}}(R_2)</math> on Curves</b>	217
4.5.1.	Introduction	217
4.5.2.	Weighted Besov Spaces on $R_1^+$	218
4.5.3.	Weighted Besov Spaces on Curves	220
4.5.4.	Traces of the Spaces $\dot{B}_p^{\dot{s}}(R_2)$ and $\dot{W}_p^{\dot{s}}(R_2)$ : The Main Theorem	222
4.5.5.	Traces of the Spaces $\dot{B}_p^{\dot{s}}(R_2)$ and $\dot{W}_p^{\dot{s}}(R_2)$ : Complements	225
4.5.6.	Traces of the Spaces $B_p^{\dot{s}}(R_2)$ and $W_p^{\dot{s}}(R_2)$	226
<b>4.6.</b>	<b>Anisotropic Spaces on the Unit Circle</b>	228
4.6.1.	Definitions	228
4.6.2.	Equivalent Norms	230
4.6.3.	Traces	232
<b>4.7.</b>	<b>Weighted Anisotropic Sobolev Spaces on Domains</b>	233
4.7.1.	Definitions and Problems	233
4.7.2.	Extensions and Traces	236
<b>4.8.</b>	<b>Boundary Value Problems for Semi-Elliptic Differential Equations</b>	237
4.8.1.	Introduction	237
4.8.2.	A Priori Estimates	238
4.8.3.	$L_2$ - $C^\infty$ -Theory	239
4.8.4.	The Main Theorem	239
4.8.5.	Complements	240
<b>5.</b>	<b>Further Types of Function Spaces</b>	241
<b>5.1.</b>	<b>Weighted Spaces of Besov-Hardy-Sobolev Type</b>	241
5.1.1.	Introduction and Definitions	241
5.1.2.	Basic Properties	242
5.1.3.	Mapping Properties	245
5.1.4.	Equivalent Quasi-Norms	249
5.1.5.	Complements	252
<b>5.2.</b>	<b>Modulation Spaces</b>	253
5.2.1.	Introduction	253
5.2.2.	Definitions	254
5.2.3.	Traces	255
5.2.4.	Further Properties	256
