

Table of Contents

Editorial Introduction	vii
 <i>J. Benedetto, C. Heil, D. Walnut</i>	
Uncertainty principles for time-frequency operators	1
1. Introduction	1
2. Sampling results for time-frequency transformations	6
3. Uncertainty principles for exact Gabor and wavelet frames	15
References	24
 <i>R.L. Ellis, I. Gohberg, D.C. Lay</i>	
Distribution of zeros of matrix-valued continuous analogues of orthogonal polynomials	26
Table of contents	26
Introduction	26
1. Preliminary results	30
1.1. Matrix-valued Krein functions of the first and second kinds	30
1.2. Partitioned integral operators	35
2. Orthogonal operator-valued polynomials	43
2.1. Stein equations for operators	43
2.2. Zeros of orthogonal polynomials	46
2.3. On Toeplitz matrices with operator entries	52
3. Zeros of matrix-valued Krein functions	56
3.1 On Wiener-Hopf operators	56
3.2. Proof of the main theorem	60
References	68
 <i>I. Gohberg, M.A. Kaashoek</i>	
The band extension of the real line as a limit of discrete band extensions, II. The entropy principle	71
0. Introduction	71
I. Preliminaries	72
II. Main results	80
References	90

M. Cotlar, C. Sadosky

Weakly positive matrix measures, generalized Toeplitz forms, and their applications to Hankel and Hilbert transform operators	93
Introduction	93
1. Lifting properties of generalized Toeplitz forms and weakly positive matrix measures	95
2. The GBT and the theorems of Helson-Szegö and Nehari	101
3. GNS construction, Wold decomposition and abstract lifting theorems	109
4. Multiparameter and n -conditional lifting theorems, the A-A-K theorem and applications in several variables	111
References	117

J.A. Ball, I. Gohberg, M.A. Kaashoek

Reduction of the abstract four block problem to a Nehari problem	121
0. Introduction	121
1. Main theorems	123
2. Proofs of the main theorems	126
References	140

A.B. Kuijper

The state space method for integro-differential equations of Wiener-Hopf type with rational matrix symbols	142
1. Introduction and main theorems	142
2. Preliminaries on matrix pencils	151
3. Singular differential equations on the full-line	154
4. Singular differential equations on the half-line	158
5. Preliminaries on realizations	160
6. Proof of theorem 1.1	164
7. Proofs of theorems 1.2 and 1.3	165
8. An example	182
References	186

H. Widom

Symbols and asymptotic expansions	189
0. Introduction	189
I. Smooth symbols on \mathbf{R}^n	195
II. Piecewise smooth symbols on \mathbf{T}	196
III. Piecewise smooth symbols on \mathbf{R}^n	198
IV. Symbols discontinuous across a hyperplane in $\mathbf{R}^n \times \mathbf{R}^n$	206
References	209

Program of Workshop	211
