

Table of contents

1	Introduction	1
2	The universal covering group G	19
3	Representations	24
4	Automorphic models	33
5	Standard and Whittaker models	41
6	Intertwining operators	49
7	Fourier coefficients of automorphic models	61
8	The operators Θ_α	72
9	Eisenstein models	84
10	$L^2(\Gamma \backslash G, \chi)$	93
11	The analytic continuation of the Eisenstein model	103
12	Spectral decomposition of $e L^2(\Gamma \backslash G, \chi)$	125
13	The space H_σ^τ	133
14	Convolution operators	148
15	Scalar product of Poincaré series	166
16	Sum formula	177
	Literature	196
	Index of notations	198
	Index of terminology	201
