Preface to the Second Edition	vii
Preface	ix
Conventions and Notations	xv
I. Fourier series and the torus group T	1
§1. Introduction, 1	
§2. Fundamental definitions, 5	
§3. Unitary representations of compact groups, 14	
§4. Fourier series of square integrable functions, 30	
§5. Fourier series of smooth functions and distributions, 34	
II. Representations of $SU(2)$ and $SO(3)$	47
§1. Construction of irreducible representations of $SU(2)$, 47	
§2. Characters of compact groups, 50	
§3. Haar measures on $SU(2)$, 54	
§4. Enumeration of irreducible representations, 57	
§5. Lie algebras and their representations, 59	
§6. Fourier series on $SU(2)$, 76	
§7. Representations of $SO(3)$ and spherical harmonics, 82	
§8. Fourier series on compact Lie groups, 93	
III. The Fourier transform and unitary representations of R^n	101
§1. Rapidly decreasing functions, 101	
§2. The Plancherel theorem and the decomposition of the regular representation, 115	
§3. Positive definite functions and Stone's theorem, 122	
§4. The Paley-Wiener theorem, 142	
§5. Tempered distributions and their Fourier transforms, 150	

IV. The Euclidean motion group	155
§1. Construction of irreducible representations, 155	
§2. Classification of irreducible unitary representations, 165	
§3. Fourier transforms of rapidly decreasing functions, 169	
§4. The Plancherel theorem, 179	
§5. Determination of $\mathcal{S}(G)$ and $\mathcal{D}(G)$, 187	
V. Unitary representation of $SL(2, \mathbf{R})$	205
§1. The Iwasawa decomposition, 205	
§2. Irreducible unitary representations, 213	
I. PRINCIPAL CONTINUOUS SERIES, 213	
§3. Irreducible unitary representations, 235	
II. PRINCIPAL DISCRETE SERIES, 235	
III. THE LIMIT OF DISCRETE SERIES 246	
§4. Irreducible unitary representations, 255	
IV. COMPLEMENTARY SERIES, 246	
§5. K -finite vectors, 265	
§6. Classification of irreducible unitary representations, 280	
§7. The characters, 306	
§8. Inversion formula, 343	
§9. Harmonic analysis of zonal functions, 362	
§10. Irreducible unitary representations of $SL(2, \mathbf{R})$, 388	
I. DISCRETE SERIES, 389	
II. COMPLEMENTARY SERIES, 391	
III. PRINCIPAL CONTINUOUS SERIES, 393	
Appendix	395
