CHAPTER 1	
Introduction to Locally Convex Topological Vector Spaces and Dual Pairs	1
§1. Locally Convex Vector Spaces	1
§2. Hahn–Banach Theorems	5
§3. Dual Pairs	11
Notes and Remarks	15
CHAPTER 2	
Radon Measures and Integral Representations	16
§1. Introduction to Radon Measures on Hausdorff Spaces	16
§2. The Riesz Representation Theorem	33
§3. Weak Convergence of Finite Radon Measures	45
§4. Vague Convergence of Radon Measures on Locally Compact Spaces	50
§5. Introduction to the Theory of Integral Representations	55
Notes and Remarks	61
CHAPTER 3	
General Results on Positive and Negative Definite Matrices and Kernels	66
§1. Definitions and Some Simple Properties of Positive and Negative Definite Kernels	66
§2. Relations Between Positive and Negative Definite Kernels	73
§3. Hilbert Space Representation of Positive and Negative Definite Kernels	81
Notes and Remarks	84

CHAPTER 4	
Main Results on Positive and Negative Definite Functions on Semigroups	86
§1. Definitions and Simple Properties	86
§2. Exponentially Bounded Positive Definite Functions on Abelian Semigroups	92
§3. Negative Definite Functions on Abelian Semigroups	98
§4. Examples of Positive and Negative Definite Functions	113
§5. τ -Positive Functions	123
§6. Completely Monotone and Alternating Functions	129
Notes and Remarks	141
CHAPTER 5	
Schoenberg-Type Results for Positive and Negative Definite Functions	144
§1. Schoenberg Triples	144
§2. Norm Dependent Positive Definite Functions on Banach Spaces	151
§3. Functions Operating on Positive Definite Matrices	155
§4. Schoenberg's Theorem for the Complex Hilbert Sphere	166
§5. The Real Infinite Dimensional Hyperbolic Space	173
Notes and Remarks	176
CHAPTER 6	
Positive Definite Functions and Moment Functions	178
§1. Moment Functions	178
§2. The One-Dimensional Moment Problem	185
§3. The Multi-Dimensional Moment Problem	190
§4. The Two-Sided Moment Problem	198
§5. Perfect Semigroups	203
Notes and Remarks	222
CHAPTER 7	
Hoeffding's Inequality and Multivariate Majorization	226
§1. The Discrete Case	226
§2. Extension to Nondiscrete Semigroups	235
§3. Completely Negative Definite Functions and Schur-Monotonicity	240
Notes and Remarks	250
CHAPTER 8	
Positive and Negative Definite Functions on Abelian Semigroups Without Zero	252
§1. Quasibounded Positive and Negative Definite Functions	252
§2. Completely Monotone and Completely Alternating Functions	263
Notes and Remarks	271
References	273
List of Symbols	281
Index	285
