

Contents

Introduction	
By A.S. Fokas and V.E. Zakharov	1

Part I **Methods of Solution**

The Inverse Scattering Transform on the Line	
By R. Beals, P. Deift, and X. Zhou	7
C-Integrable Nonlinear Partial Differential Equations	
By F. Calogero	33
Integrable Lattice Equations	
By H.W. Capel and F. Nijhoff (With 1 Figure)	38
The Inverse Spectral Method on the Plane	
By R. Coifman and A.S. Fokas	58
Dispersion Relations for Nonlinear Waves and the Schottky Problem	
By B. Dubrovin	86
The Isomonodromy Method and the Painlevé Equations	
By A.S. Fokas and A.R. Its (With 4 Figures)	99
The Cauchy Problem for Doubly Periodic Solutions of KP-II Equation	
By I. Krichever	123
Integrable Singular Integral Evolution Equations	
By P.M. Santini	147

Part II **Asymptotic Results**

Long-Time Asymptotics for Integrable Nonlinear Wave Equations	
By P.A. Deift, A.R. Its, and X. Zhou (With 11 Figures)	181

The Generation and Propagation of Oscillations in Dispersive Initial Value Problems and Their Limiting Behavior By P.D. Lax, C.D. Levermore, and S. Venakides (With 14 Figures)	205
Differential Geometry and Hydrodynamics of Soliton Lattices By S.P. Novikov	242

Part III Algebraic Aspects

Bi-Hamiltonian Structures and Integrability By A.S. Fokas and I.M. Gel'fand	259
On the Symmetries of Integrable Systems By P.G. Grinevich, A.Yu. Orlov, and E.I. Schulman	283
The n -Component KP Hierarchy and Representation Theory By V.G. Kac and J.W. van de Leur	302
Compatible Brackets in Hamiltonian Mechanics By H.P. McKean (With 1 Figure)	344
Symmetries – Test of Integrability By A.B. Shabat and A.V. Mikhailov	355
Conservation and Scattering in Nonlinear Wave Systems By V. Zakharov, A. Balk, and E. Schulman	375

Part IV Quantum and Statistical Mechanical Models

The Quantum Correlation Function as the τ Function of Classical Differential Equations By A.R. Its, A.G. Izergin, V.E. Korepin, and N.A. Slavnov	407
Lattice Models in Statistical Mechanics and Soliton Equations By B.M. McCoy	418
Elementary Introduction to Quantum Groups By L.A. Takhtajan	441
Knot Theory and Integrable Systems By M. Wadati (With 11 Figures)	468

Part V Near-Integrable Models and Computational Aspects

Solitons and Computation
By M.J. Ablowitz and B.M. Herbst (With 10 Figures) 489

Symplectic Aspects of Some Eigenvalue Algorithms
By P. Deift, L.-C. Li, and C. Tomei (With 2 Figures) 511

Whiskered Tori for NLS Equations
By D.W. McLaughlin (With 4 Figures) 537
