

Table of Contents

Preface	v
1. Function theoretical tools.....	1
1.1. CAUCHY integral	1
1.2. GREEN functions and SCHWARZ operators	18
1.3. RIEMANN boundary value problem	38
1.4. RIEMANN–HILBERT boundary value problem	45
2. Inhomogeneous CAUCHY–RIEMANN systems.....	69
2.1. Integral representations	69
2.2. Properties of integral operators	74
3. Boundary value problems for generalized BELTRAMI equations.....	99
3.1. Generalized BELTRAMI equation.....	99
3.2. RIEMANN boundary value problem	114
3.3. RIEMANN–HILBERT boundary value problem	118
3.4. POINCARÉ boundary value problem	144
3.5. Discontinuous boundary value problems	149
4. Other equations and systems related to the BELTRAMI equation.....	175
4.1. Initial boundary value problem for pseudoparabolic equations	175
4.2. Initial boundary value problem for a composite type system	184
4.3. Entire solution to nonlinear generalized BELTRAMI equations	194
5. Higher order complex differential equations and equations in several complex variables	203
5.1. Elliptic second order equations	203
5.2. Higher order equations	233
5.3. First order systems in two complex variables with analytic coefficients	239
5.4. The SCHWARZ–POISSON formula for polydiscs	252
References	257
Index of Names	267
Index of Subjects	269
Index of Corollaries, Definitions, Lemmas, Theorems	273
