C O N T E N T S

CHAPTER 1.	THE TOPIC OF THE LECTURE NOTES AND SOMETHING ON MODELLING BY PARTIAL DIFFERENTIAL EQUATIONS	6
1.1	Introduction	6
1.2	Partial differential equations in modelling	10
CHAPTER 2.	SOBOLEV AND MORREY-CAMPANATO SPACES	20
2.1	Definition of the Sobolev spaces	20
2.2	Imbedding theorems for Sobolev spaces	25
2.3	Complete continuity of imbedding	29
2.4	Traces	31
2.5	Poincaré inequality	34
2.6	Morrey-Campanato spaces	35
CHAPTER 3.	EXISTENCE OF WEAK SOLUTIONS TO BOUNDARY VALUE PROBLEMS FOR NONLINEAR SECOND ORDER ELLIPTIC SYSTEMS	39
3.1	Weak solution	39
3.2	Variational approach	45
3.3	The application of the theory of monotone operators	53
3.4	Weakly coercive operators, the Fredholm alternative	63
3.5	Problems with asymptotes in resonance	69
CHAPTER 4.	AN EXCURSION TO APROXIMATE METHODS	85
4.1	The Galerkin-Ritz method	85
4.2	Method of steepest descent	87
4.3	The Newton method	88
4.4	Differentiable homotopy	95
4.5	Secant modulus method	101
CHAPTER 5.	INTERMEDIARY REGULARITY	105
5.1	Introductory remarks	105
5.2	Estimates in the space $W^{2,2}$	105
5.3	Estimates in the space $W^{1,\infty}$	119
5.4	Maximum principle and the Liouville theorem, m = 1	129

5.5 Estimate of $\sup|\nabla u(x)|$ in virtue of the bounded slope condition 135

CHAPTER 6. REGULARITY OF WEAK SOLUTIONS TO SECOND ORDER ELLIPTIC SYSTEMS 138

6.1 Introduction 138

6.2 Partial regularity for quasilinear systems and fundamental lemmas 142

6.3 Partial regularity for nonlinear elliptic systems and regularity in the interior; condition of the Liouville type $L(\mathbb{R}^n)$ 151

6.4 A counter-example 156

6.5 The dimension $n = 2$, one equation of the second order, Saint-Venant's principle 159

6.6 Regularity up to the boundary via the fourth order differential 164

6.7 A brief introduction to the theory of isotropic polyconvex functionals in finite elasticity and the regularity of solutions for special materials 171

6.8 Nonlinear elasticity 184

6.9 The regularity up to the boundary, conditions of the Liouville type $L(\mathbb{R}^n_+)$ 189
