

C O N T E N T S

	Page
Introduction	1
Terminology and notations	6
1. Resolvents	
1.1. Excessive functions with respect to a resolvent	7
1.2. Resolvents in duality and energy form	23
Exercises	33
2. H-Cones	
2.1. Definition and first results	35
2.2. H-morphisms	43
2.3. Dual and bidual of an H-cone	56
Exercises	62
3. H-Cones of functions	
3.1. Definition and first results	68
3.2. Balayages	75
3.3. Thinness and base	83
3.4. Harmonic carrier on an H-cone of functions	88
4. Standard H-Cones	
4.1. Weak units, continuous and universally continuous elements	96
4.2. Standard H-cones, natural topology on the dual	104
4.3. Standard H-cones of functions	113
4.4. Standard H-cones of excessive functions	123
4.5. The natural topology	141
Exercises	148

	Page
5. Potential theory on standard H-Cones of functions	
5.1. Localization	152
5.2. Balayages on standard H-cones of functions	163
5.3. Thinness, essential base and fine topology	171
5.4. Negligible and polar sets	177
5.5. Carrier theory on standard H-cones of functions	184
5.6. Convergence properties and sheaf properties for standard H-cones	202
Exercises	223
6. Markov processes associated with a standard H-Cone of functions	
6.1. Sub-Markovian semigroups and Ray semigroups	230
6.2. Ray semigroups and standard H-cones	238
Exercises	243
7. H-Cones on Dirichlet spaces	
7.1. Coercive operators and projection theorems	245
7.2. Potentials in Dirichlet spaces	250
7.3. Balayages operators in Dirichlet spaces	260
7.4. Autodual H-cones and symmetric Dirichlet spaces	263
Exercises	274
Bibliography	278
Index	282
Index of symbols	286
