

## Contents

<b>Introduction</b> .....	ix
<b>Chapter I. Group actions by automorphisms of compact groups</b>	
1. Ergodicity and mixing .....	1
2. Expansiveness and Lie subshifts .....	9
3. The descending chain condition .....	19
4. Groups of Markov type .....	23
<b>Chapter II. <math>\mathbb{Z}^d</math>-actions on compact abelian groups</b>	
5. The dual module .....	35
6. The dynamical system defined by a Noetherian module .....	43
7. The dynamical system defined by a point .....	60
8. The dynamical system defined by a prime ideal .....	70
<b>Chapter III. Expansive automorphisms of compact groups</b>	
9. Expansive automorphisms of compact connected groups .....	77
10. The structure of expansive automorphisms .....	83
<b>Chapter IV. Periodic points</b>	
11. Periodic points of $\mathbb{Z}^d$ -actions .....	93
12. Periodic points of ergodic group automorphisms .....	101

**Chapter V. Entropy**

13. Entropy of $\mathbb{Z}^d$ -actions .....	105
14. Yuzvinskii's addition formula .....	114
15. $\mathbb{Z}^d$ -actions on groups with zero-dimensional centres .....	121
16. Mahler measure .....	125
17. Mahler measure and entropy of group automorphisms .....	129
18. Mahler measure and entropy of $\mathbb{Z}^d$ -actions .....	139

**Chapter VI. Positive entropy**

19. Positive entropy .....	151
20. Completely positive entropy .....	162
21. Entropy and periodic points .....	174
22. The distribution of periodic points .....	193
23. Bernoullicity .....	196

**Chapter VII. Zero entropy**

24. Entropy and dimension .....	221
25. Shift-invariant subgroups of $(\mathbb{Z}/p\mathbb{Z})^{\mathbb{Z}^2}$ .....	228
26. Relative entropies and residual sigma-algebras .....	241

**Chapter VIII. Mixing**

27. Multiple mixing and additive relations in fields .....	261
28. Masser's theorem and non-mixing sets .....	268

**Chapter IX. Rigidity**

29. Almost minimal $\mathbb{Z}^d$ -actions and invariant measures .....	285
30. Cohomological rigidity .....	293
31. Isomorphism rigidity .....	297

<b>Bibliography</b> .....	301
---------------------------	-----

<b>Index</b> .....	306
