

# CONTENTS •

Introduction . . . . .	1
 <i>Chapter 1: Noether Operators</i>	
1.1. Some Fundamental Concepts and Notations . . . . .	9
1.2. Projections and Normally Solvable Operators . . . . .	13
1.3. Noether Operators . . . . .	19
1.4. Operators with Bounded Regularizer . . . . .	32
1.5. Operators with Unbounded Regularizer . . . . .	34
1.6. Comments and References . . . . .	41
 <i>Chapter 2: Abstract Singular Equations of Normal Type</i>	
2.1. An Algebra of Operator Functions . . . . .	44
2.1.1. The Concept of the Symbol . . . . .	44
2.1.2. Polynomials of Invertible Operators . . . . .	45
2.1.3. Continuous Functions of Invertible Operators . . . . .	47
2.1.4. Inversion of Continuous Functions of Invertible Operators . . . . .	48
2.1.5. Wiener-Hopf Operators . . . . .	50
2.2. Abstract Singular Equations . . . . .	54
2.2.1. Paired Operators . . . . .	54
2.2.2. The Abstract Singular Operator . . . . .	56
2.2.3. Singular Operators with Coefficients from $\mathfrak{R}(U)$ . . . . .	58
2.3. Factorization of Functions . . . . .	61
2.3.1. Factorization in $R$ -Algebras . . . . .	62
2.3.2. Factorization in Algebras with Two Norms . . . . .	66
2.3.3. Factorization of Functions on the Real Line . . . . .	68
2.3.4. A Special Function Algebra . . . . .	69
2.4. Application of the Factorization to the Solution of Singular Equations . . . . .	72
2.4.1. Wiener-Hopf Equations . . . . .	72
2.4.2. Abstract Singular Equations . . . . .	74
2.5. Comments and References . . . . .	75
 <i>Chapter 3: Special Singular Equations of Normal Type</i>	
3.1. Discrete Wiener-Hopf Equations . . . . .	77
3.2. Wiener-Hopf Integral Equations . . . . .	83
3.3. Paired Wiener-Hopf Equations . . . . .	93
3.3.1. Paired Systems . . . . .	94
3.3.2. Paired Integral Equations . . . . .	96
3.4. Singular Integral Equations . . . . .	97
3.4.1. Properties of the Cauchy Singular Integral in $H^\mu(\Gamma)$ . . . . .	97
3.4.2. The Singular Integral Equation with Cauchy Kernel in $H^\mu(\Gamma)$ . . . . .	105

3.4.3. The Hilbert Singular Integral and the Integral Equation with Hilbert Kernel . . . . .	107
3.4.4. The Singular Integral in $L^p(I)$ . . . . .	109
3.4.5. The Case of the Unit Circle . . . . .	111
3.4.6. The Singular Integral Equation in $L^p(I)$ . . . . .	112
3.4.7. Solution of the Characteristic Equation . . . . .	116
3.4.8. The Riemann-Hilbert Boundary Value Problem . . . . .	117
3.4.9. On the Continuity of the Solution . . . . .	118
3.5. Comments and References . . . . .	119

*Chapter 4: Abstract Singular Equations of Non-Normal Type*

4.1. The Method of Special Factorization . . . . .	120
4.2. Wiener-Hopf Equations . . . . .	124
4.3. Abstract Singular Equations . . . . .	130
4.4. An Algebra of Singular Operators . . . . .	137
4.5. The Method of Left Regularization . . . . .	143
4.6. Comments and References . . . . .	149

*Chapter 5: Wiener-Hopf Integral Equations of Non-Normal Type and their Discrete Analogue*

5.1. Discrete Wiener-Hopf Equations . . . . .	151
5.1.1. The Sequence Spaces Generated by Zeros of the Symbol . . . . .	151
5.1.2. Symbols with Zeros of Integral Orders . . . . .	159
5.1.3. Symbols with Zeros of Non-Integral Orders . . . . .	164
5.2. Wiener-Hopf Integral Equations . . . . .	166
5.2.1. The Function Spaces Generated by Zeros of the Symbol . . . . .	166
5.2.2. Symbols with Zeros of Integral Orders . . . . .	175
5.2.3. Equations of the First Kind . . . . .	182
5.2.4. Symbols with Zeros of Non-Integral Orders . . . . .	188
5.2.5. Examples . . . . .	191
5.3. Paired Discrete Wiener-Hopf Equations . . . . .	194
5.3.1. The Sequence Spaces Generated by Zeros of the Symbol . . . . .	194
5.3.2. Symbols with Zeros of Arbitrary Finite Orders . . . . .	197
5.4. Paired Wiener-Hopf Integral Equations . . . . .	200
5.4.1. The Function Spaces Generated by Zeros of the Symbol . . . . .	200
5.4.2. Symbols with a Finite Number of Zeros . . . . .	202
5.5. Non-Bounded Regularization of Paired Wiener-Hopf Equations . . . . .	205
5.6. Comments and References . . . . .	207

*Chapter 6: Singular Integral Equations of Non-Normal Type*

6.1. Lemmas . . . . .	209
6.1.1. Notation . . . . .	209
6.1.2. Some Inequalities . . . . .	211
6.1.3. Further Properties of the Singular Integral . . . . .	214
6.1.4. Mean Derivatives . . . . .	218
6.2. The Spaces Generated by Zeros of the Symbol . . . . .	222
6.3. Symbols with Zeros of Integral Orders . . . . .	227
6.4. Symbols with Zeros of Non-Integral Orders . . . . .	231
6.5. A More General Case of Degeneration . . . . .	233
6.6. The Solution of a Singular Integral Equation of Non-Normal Type by Means of Factorization . . . . .	241

6.7.	Non-Bounded Regularization of Singular Integral Equations of Non-Normal Type . . . . .	243
6.7.1.	Non-Bounded Regularization . . . . .	243
6.7.2.	Equivalent Non-Bounded Regularization . . . . .	248
6.8.	Comments and References . . . . .	249
<i>Chapter 7: Systems of Singular Equations of Normal Type</i>		
7.1.	A Theorem on Operator Matrices . . . . .	251
7.2.	Factorization of Matrix Functions . . . . .	254
7.3.	Systems of Abstract Singular Equations . . . . .	263
7.4.	Systems of Wiener-Hopf Equations . . . . .	266
7.4.1.	Systems of Discrete Wiener-Hopf Equations . . . . .	266
7.4.2.	Systems of Wiener-Hopf Integral Equations . . . . .	267
7.4.3.	Systems of Paired Wiener-Hopf Equations . . . . .	267
7.5.	Systems of Singular Integral Equations . . . . .	268
7.6.	Comments and References . . . . .	271
<i>Chapter 8: Systems of Singular Equations of Non-Normal Type</i>		
8.1.	Representations of Singular Matrix Functions . . . . .	272
8.2.	Systems of Discrete Wiener-Hopf Equations . . . . .	277
8.2.1.	The Spaces Generated by Zeros of the Symbol . . . . .	277
8.2.2.	Symbols with Zeros of Integral Orders . . . . .	279
8.3.	Systems of Wiener-Hopf Integral Equations . . . . .	280
8.3.1.	The Spaces Generated by Zeros of the Symbol . . . . .	280
8.3.2.	Systems of Equations of the Second Kind . . . . .	282
8.3.3.	Systems of Equations of the First Kind . . . . .	283
8.4.	Systems of Paired Wiener-Hopf Equations . . . . .	284
8.4.1.	The Spaces Generated by Zeros of the Symbol . . . . .	285
8.4.2.	Systems of Equations of the Second Kind . . . . .	288
8.4.3.	Systems of Equations of the First Kind . . . . .	290
8.4.4.	Non-Bounded Regularization . . . . .	290
8.5.	Systems of Singular Integral Equations . . . . .	290
8.5.1.	The Spaces Generated by Zeros of the Symbol . . . . .	290
8.5.2.	Symbols with Zeros of Integral Orders . . . . .	292
8.5.3.	Symbols with Zeros of Non-Integral Orders . . . . .	294
8.5.4.	The Solution of a System of Singular Integral Equations of Non-Normal Type by Means of Factorization . . . . .	299
8.6.	Non-Bounded Regularization of Systems of Singular Integral Equations . . . . .	303
8.6.1.	Non-Bounded Regularization . . . . .	303
8.6.2.	Equivalent Non-Bounded Regularization . . . . .	304
8.7.	Comments and References . . . . .	306
<i>Chapter 9: Singular Equations in some Countably Normed Spaces and Spaces of Distributions</i>		
9.1.	Operator Equations in Distribution Spaces . . . . .	307
9.2.	Discrete Wiener-Hopf Equations . . . . .	312
9.2.1.	Some Sequence Spaces . . . . .	312
9.2.2.	Equations in Basic Spaces . . . . .	313
9.2.3.	Equations in Distribution Spaces . . . . .	319
9.3.	Wiener-Hopf Integral Equations . . . . .	321
9.3.1.	Some Function Spaces . . . . .	321

9.3.2. Equations of the Second Kind . . . . .	322
9.3.3. Equations of the First Kind . . . . .	325
9.4. Singular Integral Equations . . . . .	326
9.4.1. Lemmas . . . . .	326
9.4.2. Equations in the Basic Space . . . . .	327
9.4.3. Equations in the Distribution Space . . . . .	330
9.5. Comments and References . . . . .	331
<i>Chapter 10: Singular Equations with Discontinuous Functions</i>	
10.1. Abstract Singular Operator with Piecewise Continuous Coefficients . . . . .	333
10.2. Wiener-Hopf Equations with Piecewise Continuous Coefficients . . . . .	338
10.3. Wiener-Hopf Integro-Difference Equations and Integral Equations of the First Kind . . . . .	341
10.4. Singular Integral Equations with Piecewise Continuous Coefficients . . . . .	344
10.5. Singular Integral Equations of Non-Normal Type with Piecewise Continuous Coefficients . . . . .	347
10.6. Singular Integral Equations of Non-Normal Type on Non-Closed Curves . . . . .	351
10.7. Singular Integral Equations of Non-Normal Type with Bounded Measurable Coefficients . . . . .	356
10.8. Systems of Singular Integral Equations of Non-Normal Type with Piecewise Continuous Coefficients . . . . .	359
10.9. Comments and References . . . . .	361
<i>Chapter 11: Approximation Methods for the Solution of Singular Equations</i>	
11.1. General Theorems on Projection Methods . . . . .	363
11.2. Projection Methods for the Solution of Abstract Singular Equations . . . . .	371
11.3. Discrete Wiener-Hopf Equations of Normal Type . . . . .	375
11.4. Discrete Wiener-Hopf Equations of Non-Normal Type . . . . .	377
11.5. Wiener-Hopf Integral Equations of Normal Type . . . . .	385
11.6. Wiener-Hopf Integral Equations of Non-Normal Type . . . . .	387
11.7. Singular Integral Equations of Normal Type . . . . .	388
11.7.1. The Reduction Method . . . . .	389
11.7.2. The Collocation Method . . . . .	392
11.8. Singular Integral Equations of Non-Normal Type . . . . .	393
11.8.1. The Reduction Method . . . . .	394
11.8.2. The Collocation Method . . . . .	394
11.9. Comments and References . . . . .	396
