

# Contents

<b>1</b>	<b>Introduction and Motivation</b>	<b>1</b>
1.1	Illustration . . . . .	1
1.2	Stability and Convexity . . . . .	2
<b>2</b>	<b>Stability of Box Polynomial Families</b>	<b>7</b>
2.1	Kharitonov's Theorem . . . . .	7
2.2	Other root location regions: $\Omega$ stability . . . . .	10
2.3	Principal Vertices and Stability . . . . .	11
2.4	Principal Directions and Principal Vertices . . . . .	13
2.5	Principal Vertices and Testing Family . . . . .	18
2.6	Examples: Schur, Hurwitz, and Sector Stability . . . . .	20
2.7	Hurwitz Stability of Weighted Diamonds . . . . .	23
2.8	Extreme Point Results . . . . .	29
	2.8.1 Sector Stability of Box Polynomials . . . . .	30
	2.8.2 Hurwitz Stability of Diamond Polynomials . . . . .	31
<b>3</b>	<b>Stability Radii and Convex Analysis</b>	<b>37</b>
3.1	Stability Radii and Degree Dropping . . . . .	38
3.2	Constrained Optimization Problem . . . . .	44
3.3	Complex Stability Radius . . . . .	44
3.4	Stability Radius . . . . .	46
	3.4.1 Convex Duality Results . . . . .	46
	3.4.2 Dual Optimization Problem . . . . .	48
	3.4.3 Special Cases: $l_p$ Norms . . . . .	48
3.5	Examples: Stability Radii for Schur and Hurwitz Polynomials . . . . .	49

3.6	Real Stability Radius: Examples . . . . .	52
3.7	Link to Structured Matrix Perturbations . . . . .	55
3.8	Matrix Perturbations . . . . .	56
3.9	Multiple Matrix Perturbations and $\mu$ . . . . .	60
<b>4</b>	<b>Multiaffine Polynomial Families</b>	<b>63</b>
4.1	Orientation Preserving Multiaffine Transformation . . . . .	65
4.1.1	Image of a Two Dimensional Box . . . . .	66
4.1.2	Image of a Box Under Orientation Preserving Transformation . . . . .	68
4.2	Image of a Box Under Multiaffine Transformation . . . . .	73
4.2.1	Proof of Main Result . . . . .	75
4.3	Robust Stability of Multiaffine Polynomial Families . . . . .	75
4.4	Cascade of Uncertain Blocks . . . . .	76
4.4.1	Principal Edges and Principal Segments . . . . .	81
4.5	Interval Plants with Interval Controllers . . . . .	84
4.5.1	Eight Faces Theorem . . . . .	87
4.5.2	Frequency Domain Criterion . . . . .	90
4.6	Numerical Example . . . . .	93
<b>5</b>	<b>Multidimensional Systems and Systems with Commensurate Delays</b>	<b>99</b>
5.1	Stability of linear systems and zeros of characteristic polynomials . . . . .	100
5.2	Stability of a Bivariate Polynomial . . . . .	102
5.3	Stability Radius . . . . .	103
5.4	Reduction to the Polynomial Problem . . . . .	104
5.5	Evaluation of Stability Radius . . . . .	107
5.6	Example: Hurwitz Stability of Interval Bivariate Polynomials . . . . .	109
5.7	Quasipolynomials with Commensurate Delays and Zero Exclusion Criterion . . . . .	110
5.8	Diamond Quasipolynomials: Eight Edges Theorem . . . . .	113
<b>6</b>	<b>Uncertain Time-Delay Systems</b>	<b>117</b>
6.1	Time-Delay Systems and Zero Exclusion Criterion . . . . .	118
6.1.1	Proof of Zero Exclusion Criterion . . . . .	119
6.2	Real Interval Quasipolynomials . . . . .	121
6.3	Kharitonov Rectangles and Robust Stability Conditions . . . . .	121
6.4	Image of a Box Under Nonlinear Mapping . . . . .	124
6.5	Principal Segments . . . . .	127
6.6	Numerical Example . . . . .	129

6.7	Eight Edges Theorem . . . . .	131
<b>7</b>	<b>Convexity of Frequency Response Arcs Associated with Hurwitz Quasipolynomials</b>	<b>137</b>
7.1	Convexity for Entire Functions . . . . .	138
7.2	Angular Derivative Formalism . . . . .	144
7.3	Computation of Angular Derivatives . . . . .	146
7.4	Inner Frequency Response Set . . . . .	148
<b>8</b>	<b>Epilogue</b>	<b>153</b>
8.1	Lyapunov Criterion . . . . .	154
8.2	Simultaneous Stabilization . . . . .	155
	<b>Bibliography</b>	<b>157</b>
	<b>List of Special Symbols</b>	<b>170</b>
	<b>Author Index</b>	<b>172</b>
	<b>Subject Index</b>	<b>175</b>
