

## Contents

Introduction . . . . .	1
Terminology and Notation . . . . .	4

### PART ONE

Chapter 1. Harmonic Sheaves and Hyperharmonic Sheaves . . .	9
§ 1.1. Convergence Properties . . . . .	9
§ 1.2. Resolutive Sets . . . . .	17
§ 1.3. Minimum Principle . . . . .	24
Chapter 2. Harmonic Spaces . . . . .	30
§ 2.1. Definition of Harmonic Spaces . . . . .	30
§ 2.2. Superharmonic Functions and Potentials . . . . .	37
§ 2.3. $\mathfrak{S}$ -Harmonic Spaces and $\mathfrak{P}$ -Harmonic Spaces . . . . .	42
§ 2.4. Resolutive Sets on Harmonic Spaces . . . . .	49
Chapter 3. Bauer Spaces and Brelot Spaces . . . . .	61
§ 3.1. Definitions and Fundamental Results . . . . .	61
§ 3.2. The Laplace Equation . . . . .	73
§ 3.3. The Heat Equation . . . . .	82

### PART TWO

Chapter 4. Convex Cones of Continuous Functions on Baire Topo- logical Spaces . . . . .	99
§ 4.1. Natural Order and Specific Order. . . . .	99
§ 4.2. Balayage . . . . .	108
Chapter 5. The Convex Cone of Hyperharmonic Functions . . .	116
§ 5.1. The Fine Topology . . . . .	116
§ 5.2. Capacity . . . . .	123
§ 5.3. Supplementary Results on the Balayage of Positive Super- harmonic Functions . . . . .	127
Chapter 6. Absorbent Sets, Polar Sets, Semi-Polar Sets . . . .	137
§ 6.1. Absorbent Sets . . . . .	137
§ 6.2. Polar Sets . . . . .	142
§ 6.3. Thinness and Semi-Polar Sets . . . . .	149

Chapter 7. Balayage of Measures . . . . .	159
§ 7.1. General Properties of the Balayage of Measures . . . . .	159
§ 7.2. Fine Properties of the Balayage of Measures . . . . .	166
Chapter 8. Positive Superharmonic Functions. Specific Order . . . . .	184
§ 8.1. Abstract Carriers . . . . .	184
§ 8.2. Sets of Nonharmonicity . . . . .	194
§ 8.3. The Band $\mathcal{M}$ . . . . .	201
§ 8.4. Quasi-Continuity . . . . .	211

## PART THREE

Chapter 9. Axiom of Polarity and Axiom of Domination . . . . .	219
§ 9.1. Axiom of Polarity . . . . .	219
§ 9.2. Axiom of Domination . . . . .	227
Chapter 10. Markov Processes on Harmonic Spaces . . . . .	238
§ 10.1. Sub-Markov Semi-Groups . . . . .	238
§ 10.2. Sub-Markov Semi-Groups on Harmonic Spaces . . . . .	246
Chapter 11. Integral Representation of Positive Superharmonic Functions . . . . .	272
§ 11.1. Locally Convex Vector Spaces of Harmonic Functions . . . . .	272
§ 11.2. Locally Convex Topologies on the Convex Cone of Posi- tive Superharmonic Functions . . . . .	285
§ 11.3. Abstract Integral Representation . . . . .	299
§ 11.4. Riesz-Martin Kernels . . . . .	309
§ 11.5. Integral Representation of Positive Superharmonic Func- tions . . . . .	330
References . . . . .	337
Bibliography . . . . .	346
Index . . . . .	351
Notation . . . . .	355
