

CONTENTS

PART I : INTRODUCTION AND TOPOLOGICAL PRELIMINARIES

| | | <u>Page</u> |
|-----|--------------------|-------------|
| I. | Introduction | ... |
| II. | Topological Lemmas | ... |

PART II : GENERAL CAPACITIES OF CHOQUET AND CAPACITABILITY

| | | | | |
|-----|--------------------------|-----|-----|----|
| I. | Capacitability | ... | ... | 6 |
| II. | Weak and strong capacity | ... | ... | 11 |
| | Bibliography | ... | ... | 20 |

PART III : POTENTIALS WITH KERNELS: CONVERGENCE THEOREMS

| | | | | |
|------|--|-----|-----|----|
| I. | Preliminaries on measures, kernels and potentials | ... | 21 | |
| II. | Negligible sets and regular kernels | ... | ... | 29 |
| III. | Convergence theorems (with exceptional G^* -negligible sets) | 36 | | |
| IV. | G -capacity | ... | ... | 43 |
| V. | Second group of convergence theorems | ... | ... | 51 |
| VI. | An application to balayage principle | ... | ... | 56 |
| | Bibliography | ... | ... | 60 |

PART IV : AXIOMATIC THEORY OF HARMONIC AND SUPER-HARMONIC FUNCTIONS - POTENTIALS

| | | | | |
|------|---|-----|-----|----|
| I. | Generalised harmonic functions | ... | ... | 61 |
| II. | Superharmonic and hyperharmonic functions | ... | ... | 69 |
| III. | Nearly hyper or superharmonic functions - Reduced functions | ... | ... | 76 |

| | | | | |
|-------|---|-----|-----|-----|
| IV. | Sets of harmonic and superharmonic functions - Lattices and potentials | ... | ... | 83 |
| V. | General Dirichlet Problem | ... | ... | 98 |
| VI. | Some examples of Dirichlet Problem | ... | ... | 109 |
| VII. | Reduced functions and polar sets | ... | ... | 121 |
| VIII. | Convergence theorems | ... | ... | 129 |
| IX. | Thin sets - some applications | ... | ... | 137 |
| X. | Generalisation of Riesz-Martin integral representation | ... | ... | 145 |
| | Bibliography | ... | ... | 152 |
| | Additional Chapter | ... | ... | 153 |
| | Bibliography | ... | ... | 163 |
