## CONTENTS

CHAPTER I. THE OCCURRENCE OF MIXED BOUNDARY VALUE PROBLEMS IN POTENTIAL THEORY	•
1.1. Electrostatic Problems 1.2. Steady-State Diffusion Problems	1 7
1.3. Elastostatic Problems	10
1.4. Hydrodynamic Problems	20
1.5. The Basic Elementary Problems	23
1.6. Generalized Axisymmetric Potential Theory	24
CHAPTER II. MATHEMATICAL PRELIMINARIES	
2.1. Integrals involving Bessel Functions	26
2.2. Infinite Series involving Bessel Functions	33
2.3. Some Remarks on Integral Equations	40
2.4. Operators of Fractional Integration	46
2.5. Relations between the Operator of Hankel Transforms and the Erdélyi-Kober	
Operators	52
2.6. Jacobi Polynomials and Associated Legendre Functions	54
CHAPTER III, THE FIRST BASIC PROBLEM: THE PROBLEM OF THE ELECTRIFIED DISK	
3.1. Weber's Solution for a Disk Charged to Unit Potential	63
3.2. Beltrami's Symmetric Potentials	64
3.3. Use of Oblate Spheroidal Coordinates	66
3.4. Copson's Solution	69
3.5. Elementary Solution of the Dual Integral Equations of Beltrami's Method	74
3.6. Methods based on the Integral Representation of Harmonic Functions	77
CHAPTER IV. DUAL INTEGRAL EQUATIONS	
4.1. Introduction	80
4.2. Dual Integral Equations of Titchmarsh Type	84
4.2.1. Peters' Solution	84
4.2.2. Titchmarsh's Solution	86
4.2.3. Noble's Solution	88
4.2.4. Gordon-Copson Solution	91
4.3. Functions derived from Solutions of Dual Integral Equations	93
4.4. Special Cases corresponding to Axisymmetric Problems in Potential Theory	y 96
4.5. Dual Integral Equations with Trigonometrical Kernels	98
4.6. Dual Integral Equations with Hankel Kernel and Arbitrary Weight Function	n 106
4.6.1. Reduction to a Fredholm Equation	100
4.6.2. Reduction to a System of Algebraic Equations	113
4.6.3. Integral Equation for $\chi_1(x)$	115
4.7. The General Problem	118
4.7.1. Reduction to the Solution of two Integral Equations	119
4.7.2. The Multiplying Factor Method	120
4.7.3. The Integral Representation Method	121
4.7.4. Identification of the Operators	122
4.8. Approximate Solution of Dual Integral Equations	123
4.8. Approximate Solution of Dual Integral Equations	120

CHAPTER V. DUAL SERIES EQUATIONS	
5.1. Introduction	134
5.2. Dual Relations involving Fourier-Bessel Series 5.2.1. The Reduction of Problem (a) to the Solution of a System of Algebraic	135
Equations	136
5.2.2. The Reduction of Problem (a) to the Solution of an Integral Equation	139 142
5.2.3. The Reduction of Problem (b) to the Solution of an Integral Equation 5.3. Dual Relations involving Dini Series	144
5.4. Dual Relations involving Trigonometric Series	150
5.4.1 Dual Relations involving Fourier Sine Series	152
5.4.2. Dual Relations involving Sine Series analogous to Dini Series	158
5.4.3. Dual Relations involving Fourier Cosine Series 5.4.4. Dual Relations involving Cosine Series analogous to Fourier-Bessel	161
Series	162
5.4.5 Tranter's Formulae	163
5.5 Dual Relations involving Series of Jacobi Polynomials	165 173
5.6. Dual Relations involving Series of Associated Legendre Functions	1/3
CHAPTER VI. TRIPLE RELATIONS	450
6.1. The Origin of Triple Relations	178 180
6.2. Triple Integral Equations of Titchmarsh Type	184
6.3. Triple Equations corresponding to Axisymmetric Potential Functions 6.4. Reduction of Triple Integral Equations to Dual Series Relations	187
6.4. Reduction of Triple Integral Equations to Dual Beries Relations 6.5. Triple Equations involving Series of Legendre Polynomials	190
6.5.1 Solution of Equations of the First Kind	192
6.5.2. Solution of Equations of the Second Kind	196
CHAPTER VII. METHODS BASED ON INTEGRAL REPRESENTATIONS OF HARMONIC	
Functions	400
7.1. Kobayashi Potentials	199 201
7.2. Dovnorovich's Solution of the First Basic Problem	203
7.3. Galin's Theorem 7.4. A Simple Superposition Method	207
7.5 Green's Solution of the First Hasic Problem and Related Solutions	209
7 C Doundary Value Problems concerning a Spherical Cap	215
7.7 Roundary Value Problems concerning two Spherical Caps	219 225
7.8. The Potential due to a Circular Annulus	
CHAPTER VIII. APPLICATIONS TO ELECTROSTATICS	230
8.1. The Circular Plate Condenser	230
8.1.1. Derivation of Love's Integral Equation 8.1.2. Solution of the Integral Equation	234
9.1.2 Approximate Solutions	238
9.2 Electrified Disk between Earthed Parallel Plates	246
9.3 Electrified Disk within an Earthed Cylinder	253 259
8.4 Two Conlanar Electrified Disks	264
9 5 Two Parallel Electrified Strips	267
8.6. Field due to a Charged Annular Disk 8.7. Problems concerning Spherical Caps	270
8.7.1. Spherical Cap at Constant Potential	270
8.7.2. Spherical Cap in a Uniform Field	272
APPENDIX	
Table of Relations involving the Erdélyi-Kober Operators and the Modined	274
Operator of Hankel Transforms	274
References	275
SUBJECT INDEX	279
AUTHORS' INDEX	281
INDEX OF SYMBOLS	283
